Social Theory A Historical Introduction:

Social Theory Alex Callinicos, 2007-04-09 The second edition of this remarkably lucid text provides a wide ranging historical introduction to social theory The new edition preserves and further enhances the book's striking qualities its clarity reliability comprehensiveness and scholarship The theorists treated include Montesquieu Adam Smith and the Scottish Enlightenment Hegel Marx Tocqueville Maistre Gobineau Darwin Spencer Kautsky Nietzsche Durkheim Weber Simmel Freud Lukacs Gramsci Heidegger Keynes Hayek Parsons the Frankfurt School Levi Strauss Althusser Foucault Habermas Bourdieu Beck and Giddens Callinicos examines the ways in which social theory grew out of the eighteenth century Enlightenment a time when societies emerging in the West ceased to invoke the authority of tradition to validate themselves instead looking to scientific knowledge to justify their mastery of the world He traces social theory's connections with central themes in modern philosophy with the development of political economy and with the impact of evolutionary biology on social thought The book has been carefully updated to ensure that it engages with the most up to date debates in social theory and concludes with a substantial new chapter Here Callinicos assesses the significance of contemporary debates about globalization including the recent re emergence of critiques of capitalism and imperialism in the work of Michael Hardt Toni Negri Luc Boltanski Eve Chiapello David Harvey Robert Brenner Giovanni Arrighi and Slavoj Zizek This updated version of a widely praised text will be essential reading for students of politics sociology and social and political thought

leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity
