- Theoretical perspectives
  - *Functionalist* perspective – emphasizes how parts of a society are structured to maintain its stability. This perspective focuses on how racism is functional for dominant groups and *dysfunctional* for subordinate groups.
  - Conflict perspective – assumes that the social structure is best understood in terms of conflict or tension between competing groups. The haves and the have-nots.
  - Labeling theory – attempts to explain why certain people are viewed as deviants and others engaging in the same behavior are not.
    - *Stereotypes* are unreliable, exaggerated generalizations about all members of a group that do not take individual differences into account.

## **Sociology And The Race Problem:**

Sociology and the Race Problem James B. McKee, 1993 Tracing developments in the sociology of race relations from the 1920s to the 1960s McKee maintains that sociologists assumed the United States would move unimpeded toward modernization and assimilation aided by industrialization and urbanization The fatal flaw in their perspective was the notion that blacks were culturally inferior backward and pre modern a people who had lost their own culture and couldn't grasp that of their new society Designed to detail a failure the author says is widely acknowledged but little examined this book will be of interest to both specialists and general readers Masterful McKee transports the reader back to the intellectual world in which the early sociologists worked and does not simply treat them as evil racists His approach is informed by the sociology of knowledge Lewis M Killian author of The Impossible Revolution Phase 2 Black Power and the American Dream The American Race Problem: A Study of the Negro Edward Byron Reuter, 1927 **The American Race Problem** Edward Byron Reuter, 1927 Conceptualizing Racism Noel A. Cazenave, 2015-11-19 Conceptualizing Racism is a provocative book that confronts the language we use to discuss and understand racism Author Noel A Cazenave argues that American social science has since its inception practiced linguistic racial accommodation that blurs our understanding of systemic racism and makes it difficult to effect meaningful change Conceptualizing Racism highlights how words matter in racism studies The author traces the history of linguistic racial accommodation through the development of sociology as a discipline and illustrates how it is at play today not only within the discipline but in public life **Of One Blood, a Short Study of the Race Problem** Robert Elliott Speer, 1924 From Power to Prejudice Leah N. Gordon, 2015-05-20 Americans believe strongly in the socially transformative power of education and the idea that we can challenge racial injustice by reducing white prejudice has long been a core component of this faith How did we get here In this first rate intellectual history Leah N Gordon jumps into this and other big questions about race power and social justice To answer these questions From Power to Prejudice examines American academia both black and white in the 1940s and 50s Gordon presents four competing visions of the race problem and documents how an individualistic paradigm which presented white attitudes as the source of racial injustice gained traction A number of factors Gordon shows explain racial individualism's postwar influence individuals were easier to measure than social forces psychology was well funded studying political economy was difficult amid McCarthyism and individualism was useful in legal attacks on segregation Highlighting vigorous midcentury debate over the meanings of racial justice and equality From Power to Prejudice reveals how one particular vision of social justice won out among many contenders **Ohio State University Bulletin**, 1926 Library of Congress Subject Headings Library of Congress, 1998 **Library of Congress Subject Headings** Library of Congress. Cataloging Policy and Support Office, 2009 **Shades of Difference** Richard W. Rees, 2007 From its prehistory in the biological theories of racial difference formulated in the 1800s to its current position in academic debate Richard Rees investigates the diverse fields of scholarship from which the

multifaceted understanding of the term ethnicity is derived At the same time Rees traces the broader historical forces that shaped the needs to which the concept of ethnicity responded and the social purposes to which it was applied Centrally he focuses upon the emergence of ethnicity in the early 1940s as a means of resolving contradictions and ambiguities in the racial status of European immigrants and its subsequent legacy and implications on race and caste *Shades of Difference* introduces new perspectives on the definition of whiteness in America and makes an original contribution to the larger discussion of race through a detailed account of ethnicity's original meaning and its revaluation when later appropriated by the discourse of Black Nationalism in the 1960s and 70s Rees has produced a powerful new analysis of the cultural and political history of ethnicity in America

**In Search of Human Nature** Carl N. Degler, 1992-11-05 Winner of the Pulitzer Prize in History in 1972 and a past president of both the Organization of American Historians and the American Historical Association Carl Degler is one of America's most eminent living historians He is also one of the most versatile In a forty year career he has written brilliantly on race *Neither Black Nor White* which won the Pulitzer Prize women's studies *At Odds* which Betty Friedan called a stunning book Southern history the New Deal and many other subjects Now in *The Search for Human Nature* Degler turns to perhaps his largest subject yet a sweeping history of the impact of Darwinism and biological research on our understanding of human nature providing a fascinating overview of the social sciences in the last one hundred years Just how much of human nature is determined by genetics With this sweeping book Pulitzer prize winning historian Carl Degler provides an engrossing account of how we have grappled with that question by tracing the impact of Darwinism on the social sciences in the last hundred years The idea of biological roots to human nature was almost universally accepted at the turn of the century and was used to reinforce prejudice against women non whites and the poor whose positions were seen as the result of genetic weakness until it was discredited by the likes of Franz Boas Margaret Mead and B F Skinner But more recently Degler writes under the influence of Konrad Lorenz Jane Goodall Edward O Wilson and others a more objective approach has uncovered new links between evolution and human behavior A masterful work by one of America's preeminent historians *In Search of Human Nature* sheds brilliant new light on an essential question and how changing times have influenced the answers we have found
