**Sociology, Environmentalism, Globalization** Steven Yearley,1996-04-04 This authoritative book brings together the sociologies of globalization and the environment in one volume Steven Yearley argues that environmental issues have received scant attention in the general debate on globalization even though environmentalists have been very successful in capturing the language and imagery of the globe Sociology, Environmentalism, Globalization Steven Yearley,1996-04-28

This authoritative book brings together the sociologies of globalization and the environment in one volume Steven Yearley argues that environmental issues have received scant attention in the general debate on globalization even though environmentalists have been very successful in capturing the language and imagery of the globe *Controversy Mapping*

Tommaso Venturini,Anders Kristian Munk,2021-12-01 As disputes concerning the environment the economy and pandemics occupy public debate we need to learn to navigate matters of public concern when facts are in doubt and expertise is contested *Controversy Mapping* is the first book to introduce readers to the observation and representation of contested issues on digital media Drawing on actor network theory and digital methods Venturini and Munk outline the conceptual underpinnings and the many tools and techniques of controversy mapping They review its history in science and technology studies discuss its methodological potential and unfold its political implications Through a range of cases and examples they demonstrate how to chart actors and issues using digital fieldwork and computational techniques A preface by Richard Rogers and an interview with Bruno Latour are also included A crucial field guide and hands on companion for the digital age *Controversy Mapping* is an indispensable resource for students and scholars of media and communication as well as activists journalists citizens and decision makers Public Policy in the Age of Globalization H. Hveem,K. Nordhaug,2002-11-04 This book focuses on changes in environmental and economic policies in six developing countries It shows how domestic politics interact with international actors such as multilateral institutions It offers lively accounts of the behaviour of political actors interest groups and the civil society in particular environmentalists It shows how ideas such as those of neoliberal economics affect policymaking in particular during or after crisis but also how social protest and demands for sustainable development are mobilized European Governance G. P. E. Walzenbach,2006

Confronting sophisticated theoretical reasoning with the actual realities of policy making this book is essential reading for all those interested in the risks and opportunities of a comparative interdisciplinary approach to European governance **Palgrave Advances in International Environmental Politics** M. Betsill,K. Hochstetler,D. Stevis,2005-10-31 Palgrave Advances in International Environmental Politics provides a state of the art review of the major theoretical approaches and substantive debates of the field The first section reviews the historical development of international environmental politics as well as the theoretical and methodological approaches used in its study The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates Case studies in each chapter illuminate the main theoretical

questions that emerge from the review      Ecology and the World-System Walter L. Goldfrank, David Goodman, Andrew Szasz, 1999-06-30 Integrating environmental and world systems analyses in chapters ranging from the ancient to the contemporary from the global to the local from West to East and from North to South this book is the first collection to analyze environmental issues from the world systems perspective The introduction provides Immanuel Wallerstein's fullest explication of the role of ecological constraints in the world system Early chapters diagnose the increasing environmental threats to global sustainability and suggest ways to arrive at an integrated theoretical understanding of those threats The work then shows the historical and geographical range necessary to do justice to ecological considerations in chapters considering ancient civilizations capitalism the circumpolar North the dam builders of Asia and the polluters of East Central Europe The final chapters analyze the successes and limits of environmental movements in the United States South Africa and South Korea      Science-Based Lawmaking Dionysia-Theodora Avgerinopoulou, 2019-08-31 The Book takes the approach of a critique of the prevailing international environmental law making processes and their systemic shortcomings It aims to partly redesign the current international environmental law making system in order to promote further legislation and more effectively protect the natural environment and public health Through case studies and doctrinal analyses an array of initial questions guides the reader through a variety of factors influencing the development of International Environmental Law After a historical analysis commencing from the Platonic philosophy up to present the Book holds that some of the most decisive factors that could create an optimized law making framework include among others progressive voting processes science based secondary international environmental legislation new procedural rules that enhance the participation in the law making process by both experts and the public and also review the implementation compliance and validity of the science base of the laws The international community should develop new law making procedures that include expert opinion Current scientific uncertainties can be resolved either by policy choices or by referring to the so called sound science In formulating a new framework for environmental lawmaking processes it is essential to re shape the rules of procedure so that experts have greater participation in those in order to improve the quality of International Environmental Law faster than the traditional processes that mainly embrace political priorities generated by the States Science serves as one of the main tools that will create the next generation of International Environmental Law and help the world transition to a smart inclusive sustainable future      **Youth, Risk and Russian Modernity** Christopher Williams, Vladimir Chuprov, 2018-05-08 Title first published in 2003 This timely and original book is the most comprehensive and authoritative analysis of Russia's risk society to date Referring to the works of Douglas Beck and Giddens it considers a variety of theories of risk and applies them to young people in different risk societies showing how these youngsters have adapted to cope with risk      **Ethics of the Global Environment** Robin Attfield, 2015-02-12 This fully updated and expanded textbook looks at issues including climate change sustainable development and biodiversity preservation and sensitively addresses global developments such as

the Summits at Durban on climate and at Nagoya on biodiversity *Écologie Radicale Au Québec* Bruno Massé, 2009-04-24

International Journal of Voluntary and Nonprofit Organizations the editor has compiled a comprehensive overview of contemporary debates in third sector scholarship comprised of all original research by leaders in the field The volume will offer a critical review of the central and innovative themes that have come to form the core of third sector debate and research with an international focus The first global compendium of third sector research this volume provides a international multi disciplinary and state of the art overview of the field The contributions not only examine and review the existing scholarship but introduce new perspectives and thinking on the third sector especially in terms of future implications around the world Topics covered include History and Development of the Field New Trends in Volunteering and Philanthropy Volunteering and Participation in Developing Countries Leadership and Governance Corporate Responsibility Social Capital Global Civil Society This seminal volume provides a broad and comprehensive look at the field of Third Sector Research of primary interest to researchers in political science sociology development studies and nonprofit leadership programs *The Globalization Syndrome* James H. Mittelman, 2000-03-19 This text presents a holistic and multi level analysis of globalization connecting the economic to the political and cultural joining agents and multiple structures and interrelating different local regional and global arenas **Transnational Environmental Policy** Reiner Grundmann, 2002-11 Transnational

Environmental Policy analyses a surprising success story in the field of international environmental policy making the threat to the ozone layer posed by industrial chemicals and how it has been averted The book also raises the more general question about the problem solving capacities of industrialised countries and the world society as a whole Reiner Grundmann investigates the regulations which have been put in place at an international level and how the process evolved over twenty years in the US and Germany **Bibliographie Internationale Des Recensions de la Littérature Savante**, 1997

**International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences**, 1996 *Agribusiness and Society* Kees Jansen, Sietze Vellema, 2013-07-04 This volume examines how far agribusiness corporations are responding to the opportunities and pressures resulting from emerging environmental awareness In particular in what ways are they changing their R some changed their production

practices in a sustainable way while others have complied with or resisted state environmental regulation notably labelling systems and certification Each study explores how institutional cultural economic political and technological contexts shape the strategies of big business Topics include green bananas genetically modified tomatoes and soy the new markets in organic produce health and pesticides and access to justice The book explains why some corporations are successful in introducing environmentally friendly innovations and others are not The key to understanding contrasting outcomes is examining the interaction between internal corporate environments where profit and efficiency considerations predominate and external environments where consumer preferences NGO pressures and government regulation are important The book also explores possible new roles for the public sector The result is a sophisticated and critical analysis of business practices and regulatory systems in the agro food sector

**What is Water?** Jamie Linton, 2010 We all know what water is and we often take it for granted Because it seems so natural we seldom question how we see water But the spectre of a worldwide water crisis suggests that there might be something fundamentally wrong with the way we think about water Jamie Linton dives into the history of the modern concept of water that water can be stripped of its wider environmental social and cultural contexts and reduced to a scientific abstraction to mere H<sub>2</sub>O This abstraction has given modern society licence to dam divert and manipulate water with impunity giving rise to a growing suite of problems Linton argues that part of the solution to the water crisis involves deliberately reinvesting water with social content
