Developmental Spans in Event Comprehension and Representation Paul van den Broek, Patricia J. Bauer, Tammy Bourg, 2013-12-16 This book is about building metaphorical bridges all sorts of bridges At the most basic level it concerns the bridges that individuals build to understand the events that they experience the bridges that connect the events in the mind's eye At another level it is about bridges that interconnect findings and theoretical frameworks concerning event comprehension and representation in different age groups ranging from infancy to adulthood Finally it is about building bridges between researchers who share interests yet may not ordinarily even be aware of each other's work The success of the book will be measured in terms of the extent to which the contributors have been able to create a picture of the course of development across a wide span in chronological age and across different types of events from the fictional to the actual The individuals whose work is represented in this book conduct their work in a shared environment they all have an intellectual and scholarly interest in event comprehension and representation These interests are manifest in the overlapping themes of their work These include a focus on how people come to temporally integrate individual snapshots to form a coherent event that unfolds over time to understand cause and effect and to appreciate the role of the goal of events Another overlapping theme involves the possibility of individual differences These themes are apparent in work on the early development of representations of specific episodes and autobiographical memories and comprehension of complex events such as stories involving multiple characters and emotions The editors of this volume had two missions to create a development span by bringing together researchers working from infancy to adulthood and to create a bridge between individuals working from within the text comprehension perspective within the naturalistic perspective and with laboratory analogues to the naturalistic perspective Their measure of success will be the extent to which they have been able to create a picture of the course of development across a wide span in chronological age and across different types of events from fictional to actual

Sexuality Betty N. Gordon,Carolyn S. Schroeder,2013-06-29 There are few things that stir up our culture more than sex particularly sex and children Sexual behavior in children represents to far too many people further proof of the moral decay of our society Any issue that provokes as strong an emotional reaction as childhood sexuality is obviously in need of a rational discussion The best features of thought and reason include their moderating influence on overheated and reaction emotions Consequently

this book by Betty Gordon and Carolyn Schroeder represents a very important and even brave counter to irrationality When the Surgeon General of the United States is forced to resign because the words children and masturbation appear in the same sentence you know that there is a great deal of misunderstanding about sexuality My own evolution as a researcher in the area of child sexual abuse is a model of how naivete can be corrected by knowledge Some of my early research in sexual abuse of children led me to realize that sexual behavior was a reliable marker of victimization in a relatively large percentage of children Friedrich Urquiza Beilke 1986 My blinders to sexuality were evident in that I had not even hypothesized that to be the case in this early exploratory research When I realized how important sexual behavior was several colleagues and I set out to interview parents and foster parents of sexually abused children more specifically These adults were routinely quite reactive to our queries

Legal Issues in Child Abuse and Neglect Practice John E. B. Myers, 1998-07-09 This expanded and updated Second Edition of Legal Issues in Child Abuse and Neglect Practice offers a state of the art exploration of what role the law can play in bettering the lives of victimized children While all who work with abused children share the same goals there often exists a gap in communication between legal and helping professionals that reduces efficacy of cooperative efforts This new edition continues to provide vital information to non lawyers on how the legal system in the United States works in child abuse cases
