Sukhoi Su24 Rubian Aircraft In Action:

Sukhoi Su-24 Fencer E. Gordon, Yefim Gordon, Keith Dexter, 2005 The Fencer with its distinctive three position variable geometry wings is the Soviet counterpart to the American F 111 though somewhat smaller and lighter and to a lesser extent the Tornado Its origins certainly owed a lot to Soviet observation of the American TFX competition and the resulting swing wing variable geometry solutions First flown in 1971 it entered service from 1974 as a replacement for the Yak 28 and remains an important part of the Russian VVS inventory with several hundred having been in service It is able to carry a wide range of air to surface missiles and is capable of carrying out precision attacks in hostile airspace at night or during poor weather Much larger and more capable than previous Soviet aircraft it combines great penetrative ability with a heavy and varied bomb load but is such a versatile airframe that it has also been developed in various other versions including tactical bomber electronic warfare and reconnaissance As usual with the Aerofax series this book includes extensive detail of systems equipment weapons etc and a plethora of previously unpublished photographs and drawings *Sukhoi Fitters in Action* Hans-Heiri Stapfer, Don Greer, 1989-01-01 Beskriver de russiske jagerbombere Sukhoi Su 7 17 og 22 Sukhoi Su-24 Yefim Gordon, Dmitriy Komissarov, 2015 Developed in the Soviet Union in the 1960s the Su 24 tactical bomber has become one of the most successful aircraft in its class Featuring delta wings and auxiliary lift engines meant to improve its field performance the first prototype turned out to be more of a liability than an asset and the aircraft was redesigned to have variable geometry wings The Su 24 had its baptism of fire in the Afghan War and was also exported to Iraq Iran Algeria Libya and Syria seeing action in some of these countries At home Russian Air Force Su 24s were heavily involved in the first and second Chechen campaigns and the type has undergone a mid life update allowing it to carry precision guided munitions and is still going strong Illustrated with over 750 photographs many previously unpublished as well as line drawings color side views insignia unit badges and nose art this latest addition to the Famous Russian Aircraft series will be of interest to aviation enthusiasts and scale modelers alike Sukhoi Su-7/Su-17 E. Gordon, Yefim Gordon, Dmitriy Komissarov, 2011 Following on from the collection of successful Famous Russian Aircraft titles Yefim Gordon has teamed up with Keith Dexter and Dmitriy Komissarov to produce this insight into the Sukhoi fighter bomber family In the early 1950s the reborn aircraft design bureau headed by Pavel O Sukhoi started its renewed activities by creating two aircraft sharing the same fuselage design and powerplant the delta wing T 3 and the swept wing S 1 The former became the progenitor of several interceptors starting with the Su 9 the other aircraft became the Su 7 tactical fighter but soon evolved into the Su 7B fighter bomber Known to the West as the Fitter the Su 7B and its improved Su 7BM and Su 7BKL versions formed the backbone of the Soviet fighter bomber aviation They were also exported to many friendly nations first and foremost to some Warsaw Pact member states Poland and Czechoslovakia as well as to non aligned nations like India Algeria Egypt Iraq and others The Fitter saw action in quite a few wars the Indo Pakistani border conflict of 1971 the Arab Israeli wars The initial Su 7 Fitter A was

superseded by the Su 17 which differed primarily in having variable geometry wings The prototype made its maiden flight in 1966 the production version completely supplanted the original Su 7 in Soviet Air Force service in the 1980s The swing wing Su 17 proved highly efficient in the Afghan War earning the affection of the pilots who flew it Its high combat capabilities were duly recognized abroad apart from the Warsaw Pact Poland Czechoslovakia East Germany Hungary and Bulgaria the Su 20 and Su 22 export variants were delivered to Egypt Iraq Peru Yemen Afghanistan and other nations Iraq used its Su 22s against Iran in the war of 1980 88 and the ultimate Su 22M4 is still in service with the Polish Air Force albeit with upgrades to make it compatible with NATO operational standards This new title written by 3 aviation enthusiasts including expert in the field Yefim Gordon and is illustrated with a whole host of unpublished photos as well as numerous line drawings and colour side views which will undoubtedly be of interest to aviation enthusiasts and scale modellers alike The in service and operators chapters feature insignia and unit badges nose art worn by individual aircraft making this a must have for any aviation and scale model enthusiast s collection

Sukhoi Su-15 Yefim Gordon, Dmitriy Komissarov, 2015-04-30 A history of this supersonic Soviet interceptor including useful information for model makers In the late 1950s the Sukhoi Design Bureau already an established fighter maker started work on a successor to its Su 9 and Su 11 single engined interceptors for the national Air Defense Force Similar to its predecessors the new aircraft designated Su 15 had delta wings unlike the Su 9 Su 11 however it had twin engines and lateral air intakes freeing up the nose for a powerful fire control radar First flown in May 1962 the Su 15 officially entered service in 1965 and was built in several versions the late ones having cranked delta wings and a more capable radar Being an air defense fighter the Su 15 frequently had to deal with intruders Unfortunately the aircraft gained notoriety in two separate incidents involving shoot downs of Boeing airliners a 707 in 1978 and a 747 in 1983 both of which were South Korean and had intruded into Soviet airspace on what were very probably clandestine spy missions This book describes the developmental and service history of the Sukhoi Su 15 and contains a comprehensive survey of all model making kits currently available on the market
