 Mearns, Chris E. Forest, Hayley J. Fowler, Robert Lempert, Robert L. Wilby, 2025-07-14 This edited volume with open access
 discusses all aspects of uncertainty in climate change research with a unique emphasis on decision making under uncertainty
 and the assessment of various uncertainties in the landscape of decision making By analyzing uncertainty through the lens of
 decision making the book seeks to understand and assess the various uncertainties inherent in climate change research
 including uncertainties in economic impacts human health and vulnerability fluctuations in the physical climate system
 changes in infrastructure and future climate projections Very little published material exists on the uncertainties regarding
 vulnerability of different populations to climate change and so the book characterizes the uncertainty in vulnerability to
 better formulate solutions to climate change problems in affected populations The volume will be of interest to students post
 docs early career scientists and researchers interested in all aspects of climate change After an introduction that addresses
 the issue of uncertainty in general as it pertains to climate change research the book is divided into 5 main sections Section 1
 focuses on uncertainty in policy and decision making and how climate related policy choices impact risk management impact
 mitigation and adaptation Section 2 discusses uncertainty in climate change impacts including impacts in agriculture water
 resources transportation infrastructure and human health and vulnerability Section 3 analyzes physical climate uncertainties
 such as Earth system projections emissions concentrations and sea level rise projections Section 4 details the methods for
 quantifying uncertainty from a statistical perspective Section 5 concludes the volume with discussions on special topics and
 integrated themes on uncertainty including ethics and uncertainty communication the economics of climate change and
 integrated modeling for decision support
