Opened Windows J.R. Gonzalez,2017-06-14 How far would you go for the one you love Opened Windows is about betrayal love devotion and sacrifice Two people meet and fall in love She betrays him in a way meant to make him go away forever because his devotion to her scares her After a lifetime of hurt she cant take the chance Then he finds out the truth about itwhy she did it and what she went through but in the meantime people all around her are dying in a horrible manner that the police can only describe as spontaneous combustion because they have no clue until it happens again and he thinks she might be next and decides to save her How far would you go for the one you love **Restoring the Soul of the World** David Fideler,2014-11-20 Humanity s creative role within the living pattern of nature Explores important scientific discoveries that reveal the self organizing intelligence at the heart of nature Examines the idea of a living cosmos from its roots in the earliest cultures to its eclipse during the Scientific Revolution to its return today Reveals ways to reengage our creative partnership with nature and collaborate with nature s intelligence For millennia the world was seen as a creative interconnected web of life constantly growing developing and restoring itself But with the arrival of the Scientific Revolution in the 16th and 17th centuries the world was viewed as a lifeless clock like mechanism bound by the laws of classical physics Intelligence was a trait ascribed solely to human beings and thus humanity was viewed as superior to and separate from nature Today new scientific discoveries are reviving the ancient philosophy of a living interconnected cosmos and humanity is learning from and collaborating with nature s intelligence in new life enhancing ways from ecological design to biomimicry Drawing upon the most important scientific discoveries of recent times David Fideler explores the self organizing intelligence

at the heart of nature and humanity's place in the cosmic pattern. He examines the ancient vision of the living cosmos from its roots in the world soul of the Greeks and the alchemical tradition to its eclipse during the Scientific Revolution to its return today. He explains how the mechanistic worldview led to humanity's profound sense of alienation for if the universe only functioned as a machine there was no longer any room for genuine creativity or spontaneity. He shows how this isn't the case and how even at the molecular level natural systems engage in self-organization, self-preservation and creative problem-solving mirroring the ancient idea of a creative intelligence that exists deep within the heart of nature. Revealing new connections between science, religion and culture, Fiedler explores how to reengage our creative partnership with nature and new ways to collaborate with nature's intelligence. Treasure Hunters: Quest for the City of Gold James

Patterson, 2018-01-15 Gear up for an exciting adventure with the thrill-seeking Kidds as they search for a missing Incan city in South America made entirely of gold. When Bick and Beck Kidd find a hidden trove of pirate treasure, it includes a map with clues to an even bigger score: the lost Incan city of Paititi. But treasure hunting is never easy and when the map is stolen, the Kidds must rely on Storm's picture-perfect memory to navigate the dangerous Amazon jungle. Watch out for that nest of poisonous snakes. To save the Amazon rainforest and stop a Peruvian tribe from losing their home, the Kidds must unlock the secrets to the missing map and find the fabled city of Paititi before the bad guys find it first. The race is on. *Africa for Kids*

Harvey Croze, 2007-04-01 Africa is brought to life in this imaginative look at the plants, animals and people that make it such a fascinating continent. Studies of both traditional tribes and modern African cities showcase Africa's diversity and authentic activities allow kids to dive into the rich culture by making a Maasai bivouac shelter, writing a fable in the African style, working as a field biologist, making a ritual elephant mask and learning to tie an African Kanga dress. This cross-cultural study also shows kids what challenges Africa faces today while giving them a look at what it is like to live on this interesting continent.
