TEACHING HANDICAPPED CHILDREN EASILY is a text and manual for those teachers, teacher trainees, and parents who will be working with moderately or mildly learning handicapped children, but who have no specialized training to work with such children. The increasing number of exceptional children requiring special education services has been increasing to engulf unprepared educators. This book takes the position that one does not need specialized training nor does one need to label or categorize mildly or moderately handicapped children in order to help them to learn effectively and easily. Instead, the need exists to simply instruct the average teacher to concentrate on the

handicapped children's strengths and deficiencies, which are practically the same for all children. In fact, the authors have practiced this theory for two years with exceptional effectiveness.

This book has considerable value for parents of exceptional children in giving them not only some understanding of their children, but also some suggestions that can be used in helping their children at home.

Written in an informal style with as little technical terminology and educational jargon as possible, this handbook will provide the average educator with the knowledge necessary to teach the handicapped easily.
