Teaching Writing A Systematic Approach:

Teaching Writing Colin Peacock, 2017-11-28 Originally published in 1986 The traditional approach to teaching writing concentrates on mastering the different aspects of writing in the hope that these will eventually unite as a set of integrated skills More progressive teachers emphasise that writing is a total process which is caught intuitively rather than explicitly taught Both models are partially unsatisfactory and consequently a third approach has evolved which seeks to combine the best of both This book considers this systematic approach which seeks to retain the emphasis on writing as a total process but identifies within each communicative context the set of sub skills involved The author discusses and illustrates the strengths and weaknesses of this approach and the changes in professional thinking and practice that are essential to its successful adoption He presents an overview of the nature of the writing process to enable teachers to make clearer and more explicit statements about their objectives in setting classroom writing tasks *Teaching Writing* Evelyn
