Integrative Religious Education in Europe Wanda Alberts, 2012-02-14 This book is a contribution to the development of the young discipline of the didactics of the Study of Religions Religionswissenschaft in international perspective Integrative religious education refers to education about different religions in classrooms with children of various religious and non religious backgrounds Cornerstones of recent debates about theory and methodology in the academic study of religions and in education are discussed in the first chapter They form the basis of the following analysis and evaluation of current approaches to integrative religious education in Europe with a special focus on England and Sweden Particular attention is paid to the different underlying concepts of religion education and ways of representing religious plurality in these approaches Building on a discussion of the current situation of teaching and learning about religions in schools in Europe in the context of wider cultural social and political debates the book concludes with the suggestion of a framework for integrative religious education in Europe from a perspective that combines insights from the study of religions and education

Teaching Christianity Clive Erricker, 1987 Revised and updated this invaluable teaching tool looks at Christianity as a world religion and examines the implications for all those involved in religious education **Reasons for Living** Marisa Crawford, Graham Rossiter, 2006-11-01 *Reasons for Living* begins by exploring the development and psychological function of meaning identity and spirituality in the lives of young people This exploration can contribute significantly to the professional background of those engaged in the education and care of youth in various contexts The book then focuses on what it means to educate young people in meaning identity and spirituality Implications are considered for three school contexts the spiritual and moral dimension to the general curriculum in public and independent schools religious education in religious schools and state based Religion Studies courses *Reasons for Living* makes a much needed contribution to the philosophy of education by discussing the links between education and young people s spiritual and moral development It also provides new insights and approaches to values education and religious education Areas of fundamental importance in Australian education have long been held back not only by the gap between theory and practice but also by the very complexities of young people s personal development in contemporary Western Culture *Reasons for Living* offers a constructive and practical way forward

International Handbook of the Religious, Moral and Spiritual Dimensions in Education Marian de Souza, Gloria Durka, Kathleen Engebretson, Robert Jackson, Andrew McGrady, 2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook

presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education. The result is a collection of essays which reflects the discipline in all of its internationality as it is today. Embedded within the chapters is also an agenda for the future where the religious, moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society. As well, it offers a vision for the emergence of a peaceful and just world.

Religious Education and the Public Sphere Patricia Hannam, 2018-08-06

Religious Education and the Public Sphere reveals through an analysis of theory and practice that religious education is resting on historic and persistent assumptions about both religion and education. Drawing on work from Arendt and Weil, new ideas emerge regarding religious education's constituent elements: education and religion. It offers a new and timely proposal for religious education and argues for a broader understanding of religion, bringing a fresh contribution to current discussions regarding the relationship between religion and education in the public sphere. Some practical considerations emerging from theory developed through the earlier parts of the book are presented in the final section, including the teacher's role and what should guide religious education curriculum. At a time when there is raised interest in the role of religion in the public sphere internationally, this book aims to contribute something new, both theoretically and practically, to discussions regarding the role of religion in education, which is relevant to educational contexts worldwide. This book will be vital reading for academics and researchers in the fields of religion and religious studies, education philosophy, of education and religious education, and will also be of great interest to teachers and policy makers working in the field of religious education in the public sphere.
