techniques Widespread use of images requires organization of the information in the databank or database whose dimensions are sometimes so wide as to be too complex to manage therefore information retrieval techniques arise from this need The new instruments used in image and or remote diagnosis image transmission the respect of the law in force and the ever more relevant image storage capacity required for this task imply the use of techniques of visual language and information retrieval The proceedings have been selected for coverage in OCo Index to Scientific Technical Proceedings ISTP ISI Proceedings OCo Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings **Hearings** United States.
