The peacock is a commonly used name for a colorful male peafowl. The females are called peahens and are smaller and grey or brown in colour.

Peacocks are well known for their large eye-spotted tail feathers (plumage). Its tail feathers can form a fan that can stretch out to nearly 2 meters in length!

Peacocks use their beautiful tail feathers to attract females for mating purposes. If it feels threatened or intimidated by another animal, it will also use its tail feathers to make itself bigger and more dominate.
