**Making More of Small Spaces** Stephen Crafti, 2003 Making the Most of Small Spaces was so popular we've decided to do it all again. Like before, the new More Small Spaces features new designs discovered and presented by Stephen Crafti. It shows that with careful detail and planning, architects can somehow make more of small spaces. *Studio Apartments* James Grayson Trulove, II Kim, 2000-01-01 Provides a practical guide to interior decoration for small apartments and offers tips on how to create efficient kitchens, appealing baths, adequate storage and work and entertainment areas. Instrumentation and Research Programmes for Small Telescopes J.B. Hearnshaw, P.L. Cottrell, 2012-12-06 This volume is the proceedings of IAU Symposium No 118 on Instrumentation and Research Programmes for Small Telescopes where small telescopes were defined as those ground-based instruments with apertures less than 1.5 m. The scientific goal of the symposium was to emphasise research programmes which were more suited to smaller telescopes on which frequent regular observations can be made. A wide variety of topics on instrumentation, photometry, spectroscopy and polarimetry of objects in the solar system to extragalactic systems were discussed. Each of the four scientific days of the symposium comprised a number of invited review papers, contributed oral papers and discussion sessions devoted purely to the large number of poster papers. An introductory paper on the research potential of small telescopes sets the scene for the symposium. The proceedings have then been divided into three sections: Section I Telescopes and instrumentation; Section II Photometric research programmes; Section III Spectroscopic research programmes. The diversity of topics within each of these sections indicated the extent to which small telescopes have and can contribute greatly to astronomical research. Dr J. A. Graham's summary of the symposium, which illustrates the opportunities available with small telescopes, concludes these proceedings. As in all symposia, the importance of the discussion following each paper was realised. The discussion was recorded on tape and, wherever possible, on questions and answer sheets transcribed and then edited. Tritium Supply and Recycling Facilities Siting, Idaho National Engineering Laboratory [ID], Nevada Test Site [NV], Oak Ridge Reservation [TN], Pantex Plant [TX], or Savannah River Site [SC], 1995 Aphids on the World's Herbaceous Plants and Shrubs, 2 Volume Set R. L. Blackman, Victor F. Eastop, 2008-04-15 Aphids are well known as pests of agriculture, horticulture and forestry, but they are also one of the most biologically interesting groups of plant-feeding insects and thus have attracted the attention of biologists in many research fields such as ecology, biodiversity, physiology, behaviour and genetics. Following the successful format of previous books on the world's aphids by the same authors, these two volumes provide a comprehensive species-by-species account of the aphids on the world's herbaceous plants and shrubs. They can be used not only as an identification guide and information source for entomologists and taxonomists throughout the world, but also as a unique database for studies of biodiversity and insect-plant relationships. In all, 3120 aphid species in 340 genera are covered, feeding on 2150 genera of host plants. Volume 1 features comprehensive host lists and keys to the aphids colonizing each plant genus. This information is supplemented in Volume 2 by

a systematic account of all the aphid species which provides information on their appearance in life host range geographical distribution and life cycles There are 357 original line drawings 252 photographs of slide mounted specimens and 1000 references Aphids on the World s Herbaceous Plants and Shrubs is the culmination of many years of work by two leading specialists and provides an essential research tool and standard reference work for entomologists in universities and research institutes throughout the world
