Abstract

Self-performance is important among entrepreneurs due to increasing the business enhancement. Recent research has explored how business performance is influenced by different factors. HRV (Heart Rate Variability) Biofeedback, for instance, is a phenomenon where physiological changes occur in the interval between heartbeats. This study therefore examined the relationship between HRV Biofeedback training, increasing business performance and success in business. Nevertheless, previous literature showed that there is less current study which focused on the self-performance using Biofeedback techniques among entrepreneurs in Malaysia. Thus, this study was aimed to: 1) Identify the profile of Heart Rate Variability (HRV) among small entrepreneurs and 2) Examined the measure of success among small entrepreneurs through increased income earnings after the HRV training. A total of 50 respondents of small entrepreneurs were recruited in this study. The data collected involved a questionnaire survey with participants, profit and sales analysis and analysis of HRV. Statistical correlation analysis was used to examine the relationship between business performance and business insights from the point of HRV. The finding shows that there is a very strong relationship between performance increasing in term of incomes with the profile of HRV among participants with the score of 0.984. This showed that HRV Biofeedback training technique is appropriate to be used as an intervention program to increase entrepreneurship skills among small entrepreneurs in Malaysia.

1. Introduction

Entrepreneurship is an area of commercial potential in improving the economic performance of a country (Aouni & Surlmont, 2008). Entrepreneurship in Malaysia has evolved since Malaysia gained independence in 1957. Entrepreneur is defined as a person who undertakes an enterprise or entrepreneur. According to Encyclopedia of Americana International Edition, entrepreneur is defined as a businessman or women who risked combining factors of production such as capital, labor, materials and rewarded through profits from the market value of goods. Besides, Webster's Third New International Dictionary defines an entrepreneur as a person who manages an economic activity, owns, manages and assumes the risks of a business. Entrepreneurs are individuals who do business and have been established in terms of the daily needs but have ambitions to expand its influence and wealth (Adnan & Mohamad Dahlan, 2002). According to Richard (2009), entrepreneur is a person engaged in the business of either selling or trading goods and is the sole owner of the business.

Biofeedback training technique is a method used to help individuals make the internal control yourself as the mind, emotions and heart (Sutarto, 2008). Biofeedback techniques have been identified as be able to detect emotional disorders and provide intervention. The Biofeedback techniques are being used to measure internal characteristics changes such as physiological and psychological changes. The Biofeedback devices are being fitted to a client in order to obtain physiological changes data. Through Biofeedback techniques, the mind changes could be measures by using the EEG.
