### **4.1 INTRODUCTION**

---

The study of public policy is very important for the relation between the public policy and its context is very intimate and organic.

This mutual influence accounts for varied experiences in the realm of public policy in different countries. This is also the reason, why all the countries do not have the same public policies. Assuming that they have the same policies, the priorities would not be the same. Thus, the nature of policy varies from country to country depending upon the requirement of its economy, social and cultural values, availability of resources, constitutional ideals, international pressure as well as, pressures from political parties, interest groups, trade unions, cultural and religious associations, etc., for example in India, our emphasis has been on the question of growth and modernisation, removal of poverty, development of agriculture, social justice, etc. Our public policies have been formulated keeping in view, all these issues. The western or developed countries have been concentrating on environmental hazards, innovations in science and technology, etc.

Thus the priorities in each country affect the nature of its public policies. The changing nature of public policies calls for extensive study of these policies. The questions relating to how these policies are formulated? Are these made keeping the priorities in view? Are these able to make optimal utilisation of available resources? All these questions have to be properly examined. As the nature of public policy largely depends on the role of the State, this Unit will try to highlight how the public policies are generated and handled by the State. The Unit will discuss the State's role in public policy process and throw light on the urgent need for a systematic public policy study. In order to stress upon the importance of public policy study, a discussion on public policy experience in India regarding its policies to bring about structural, economic and technological changes will also be made.

*Investing in Maternal Health* Indra Pathmanathan, Jerker Liljestrand, 2003 This study provides the most comprehensive and detailed analysis available on factors behind the decline in maternal mortality in Malaysia and Sri Lanka in the past 50 to 60 years and the magnitude of health system expenditures on maternal health The main findings are that a modest investment in maternal health services combined with other poverty reduction measures leads to a fairly rapid decline in the maternal mortality ratio MMR defined as the number of maternal deaths per 100 000 live births The strategies of Malaysia and Sri Lanka changed over time from an initial emphasis on

expanding the provision of services especially in underserved areas to increasing utilization and finally to emphasizing the improvement of quality Removing financial barriers to maternal care for clients was an important step in both countries Professional midwives constitute the backbone of maternal care in Malaysia and Sri Lanka The MMR reduction in developing countries is feasible with modest public expenditures when appropriate policies are adopted focused wisely and adapted incrementally in response to environmental conditions and systems capacity World Bank Income and Influence Ethan B. Kapstein, Branko Milanović, 2003 This book seeks to contribute to the ongoing debate over the role of social policy in emerging markets and postcommunist transition economies with a focus on Latin America East Asia and the former Soviet bloc The authors argue that poverty reduction has not been the major objective of social policy in these countries or even of the international financial institutions that are important providers of loans and advice to them Instead the main purpose of these programs has been to help smooth the consumption patterns of those formal sector workers who feared that economic liberalization would reduce their incomes and job prospects Textbook of International Health: Global Health in a Dynamic World , 2009-04-06 This classic text formerly known as the Basch textbook now completely revised in an updated new edition brings together information that students and professionals working in the wide variety of disciplines concerned with international health will find in no other single source It synthesizes historical cultural environmental economic and political considerations to provide a comprehensive global overview of the many factors that determine the health of individuals and populations The major determinants of health status in all regions of the world are discussed and interventions undertaken at community national and international levels are described The new edition features a renowned new authorship committed to updating and expanding the entire content while retaining the core elements of Basch s excellent text Diversity in Africa Kurt April, Marylou Shockley, 2006-11-24 Africa s diversity is its greatest resource and challenge In this book leaders from business government academia and the voluntary sector discuss the implications of this diversity for leadership Throughout contributors relate organisational issues to the social political and cultural contexts and focus on the role of effective leadership **Good Governance and Development** Brian Smith, 2007-08-20 An exploration of the implications of the good governance agendas for developing and newly democratized countries The book assesses the good governance agenda and examines the view of the international development agencies Finally it considers the contribution political science can make to an understanding of each dimension of governance Development Economics Shahrukh Rafi Khan, 2019-10-23 Following the 2007 2009 financial and economic crises there has been an unprecedented demand among economics students for an alternative approach which offers a historical institutional and multidisciplinary treatment of the discipline Economic development lends itself ideally to meet this demand yet most undergraduate textbooks do not reflect this This book will fill this gap presenting all the core material needed to teach development economics in a one semester course while also addressing the need for a new economics and offering flexibility to instructors Rather than taking the

typical approach of organizing by topic the book uses theories and debates to guide its structure This will allow students to see different perspectives on key development questions and therefore to understand more fully the contested nature of many key areas of development economics The book can be used as a standalone textbook on development economics or to accompany a more traditional text

Reassembling Social Security Carmelo Mesa-Lago, 2008-01-31 The reform of social security pensions and healthcare is a key issue for the modern world and in many ways Latin America has acted as a social laboratory for the reform of these systems From the reforms that took place in Chile in 1981 most pension and health care systems in the region have seen reform and been fully or partially privatized Many other countries considering reform of their own systems have been influenced by the policies implemented in Latin America Yet despite the importance and influence of these reforms until now there has not been an integrated and comprehensive analysis of the changes and their effects This book is the result of four years of painstaking work data collection field research and international collaboration and so fills the vacuum in the literature with a systematic comparison of pension and healthcare reforms in the 20 Latin American countries It identifies reform models and elaborates taxonomies to facilitate their understanding and comparison Some key features of the reforms to emerge are labour force and population coverage equity and solidarity sufficiency and quality of benefits state regulation competition and degree of privatization efficiency and administrative costs social participation in management financing sources and long term sustainability Effects of the reforms on social security principles are measured based on recent standardized statistics and other information Goals or assumptions of the reforms are contrasted with actual outcomes and the pros and cons of private versus private provision assessed Detailed policy recommendations are offered to correct current problems and improve pension and healthcare systems This is the first book to comprehensively study these influential reforms in Latin America s pension and health care systems and as such will be of importance to academics and researchers interested in social security and welfare policy pensions health care and public policy Social security pension and health care policy makers And social security pension and health care consultants and practitioners Published in association with PAHO

comprehensive evaluation of the state of welfare states developed and developing. At a time when disillusion with neo liberal development nostrums is mounting, alternative models of development are being revisited. Kerala's 30 million people may not have experienced rapid growth in GDP per capita but they have for the past several decades achieved a remarkable social record in terms of adult literacy, infant mortality, life expectancy, stabilising population growth and narrowing gender and spatial gaps. What are the implications of the disjuncture between human development and economic growth? What are the political, social and cultural factors responsible for Kerala's success? Does its human development record necessarily relate to sustainability in environmental terms? How inclusive has the Kerala model been, particularly for the fishing community and other socially marginalised groups? Can the new people's campaign for decentralised development from below make Kerala's development experience more enduring? What realistic view can be taken of its replicability elsewhere in India or further afield in the South? These are among the most important questions explored in this timely reassessment.
