Social Interest And Categorical Structure:

Right, Power, and Faquanism Zhiwei Tong, 2018-08-13 In *Right Power and Faquanism* Tong Zhiwei proposes that right and power are ultimately a unified entity which can be named faquan and that the purpose of law should be to establish a balanced faquan structure and to promote its preservation and proliferation Faquan is thus a jurisprudential category reflecting the understanding of the unity of right and power It has interest protected by the law and property with defined ownership as its content and manifests itself as the external forms of jural right freedom liberty jural power public function authority competence privilege and immunity etc Faquanism relies mainly on six basic concepts faquan right power quan residual quan and duty to analyze the content of interests and property in all legal phenomena *Theory of Social Choice on Networks* Wynn C. Stirling, 2016-09-22 Classical social choice theory relies heavily on the assumption that all individuals have fixed preference orderings This highly original book presents a new theory of social preferences that explicitly accounts for important social phenomena such as coordination compromise negotiation and altruism Drawing on cybernetics and network theory it extends classical social choice theory by constructing a framework that allows for dynamic preferences that are modulated by the situation dependent social influence that they exert on each other In this way the book shows how members of a social network may modulate their preferences to account for social context This important expansion of social choice theory will be of interest to readers in a wide variety of disciplines including economists and political scientists concerned with choice theory as well as computer scientists and engineers working on network theory *Gender and Power* Raewyn Connell, 2014-05-15 This book is an important introductory textbook on sexual politics and an original contribution to the reformulation of social and political theory In a discussion of among other issues psychoanalysis Marxism and feminist theories the structure of gender relations and working class feminism Connell has produced a major work of synthesis and scholarship which will be of unique value to students and professionals in sociology politics women s studies and to anyone interested in the field of sexual politics Visit www.raewynconnell.net *Science and the Sociology of Knowledge (RLE Social Theory)* Michael Mulkay, 2014-08-07 How far is scientific knowledge a product of social life In addressing this question the major contributors to the sociology of knowledge have agreed that the conclusions of science are dependent on social action only in a very special and limited sense In *Science and the Sociology of Knowledge* Michael Mulkay s first aim is to identify the philosophical assumptions which have led to this view of science as special and to present a systematic critique of the standard philosophical account of science showing that there are no valid epistemological grounds for excluding scientific knowledge from the scope of sociological analysis The rest of the book is devoted to developing a preliminary interpretation of the social creation of scientific knowledge The processes of knowledge creation are delineated through a close examination of recent case studies of scientific developments Dr Mulkay argues that knowledge is produced by means of negotiation the outcome of which depends on the participants use of social as well as technical resources The analysis also

shows how cultural resources are taken over from the broader social milieu and incorporated into the body of certified knowledge and how in the political context of society at large scientists technical as well as social claims are conditioned and affected by their social position The New Institutionalism in Organizational Analysis Walter W. Powell, Paul J.

DiMaggio, 2012-09-21 Long a fruitful area of scrutiny for students of organizations the study of institutions is undergoing a renaissance in contemporary social science This volume offers for the first time both often cited foundation works and the latest writings of scholars associated with the institutional approach to organization analysis In their introduction the editors discuss points of convergence and disagreement with institutionally oriented research in economics and political science and locate the institutional approach in relation to major developments in contemporary sociological theory Several chapters consolidate the theoretical advances of the past decade identify and clarify the paradigm's key ambiguities and push the theoretical agenda in novel ways by developing sophisticated arguments about the linkage between institutional patterns and forms of social structure The empirical studies that follow involving such diverse topics as mental health clinics art museums large corporations civil service systems and national politics illustrate the explanatory power of institutional theory in the analysis of organizational change Required reading for anyone interested in the sociology of organizations the volume should appeal to scholars concerned with culture political institutions and social change *Film Cultures* Janet

Harbord, 2002-09-20 *Film Cultures* is thought provoking and challenging By opening film theory up to the many simultaneous networks of relation that is the cultures of film it asks both viewer and student to take film more seriously Communication Research Trends *Film Cultures* weaves together insights from cultural theory and film studies to provide a complex and absorbing theoretical account of contemporary film culture Harbord writes with authority imagination and wit and her delicate deployment of modernist and postmodernist cultural accounts makes rewarding reading Christine Geraghty Professor of Film and Television University of Glasgow *Film Cultures* argues that our tastes for film connect us to social spatial and temporal networks of exchange and meaning Whether we view film in the multiplex arthouse or the gallery as cinema premiere video hire or from a cable channel whether we approach film as a singular object or a hypertext linked to ancillary products our relationship to film is inhabiting a culture Shifting the focus of film analysis from the text to paths of circulation *Film Cultures* questions how film connects us to social status and national and global affiliations **The**

Cumulative Book Index, 1990 A world list of books in the English language A Theory of Legal Sentences Manuel Atienza, J. Ruiz Manero, 2012-12-06 Legal statements are according to the authors the most basic elements of the law Nevertheless they must be considered not only as the pieces of a puzzle but also as the components of a dynamic and highly complex reality the law of contemporary society The book presents an analysis of the different types of legal statements mandatory rules principles power conferring rules definitions permissions values and the rule of recognition from a threefold perspective that is considering their logical structure their function in legal reasoning as reasons for action and

The Workers of Nations Sanford M. Jacoby, 1995 The new international economy is today the single most important factor shaping relations between employers unions and governments in the world s advanced industrial societies While companies compete in global markets with firms around the world workers remain fixed in each country and are influenced by local customs and institutions mores This book explores how globalization affects the contemporary workplace and how workplace policies can make nations more internationally competitive Unlike other country by country treatments of the subject this analysis compares and contrasts the experiences of different nations around important developments such as the labor market consequences of regional trading pacts the international diffusion of new forms of work organization and the strategies that nations are pursuing to keep their work systems competitive The contributors come from a variety of disciplines but all bear expertise in international industrial relations

Inverting the Norm Trevor N. Wedman, 2022-11-21 Trevor N Wedman seeks to understand the key assumptions underlying modern legal theory Going back to Hobbes but also making use of the developments in the theory of action and language philosophy over the past century he breaks down the static conception of the state into one dependent on the actions and reflections of individuals i e its citizens He develops a social ontological theory of the law in which the law is not taken as a mere given but as an institutional fact He criticizes both the Kelsenian conception of the Basic Norm and the Hartian notion of the Rule of Recognition as failing to account for the agency of individuals The author turns to the work of one of Kelsen s contemporaries Felix Somlo in order to develop an alternative conception of the law that operates not from the top down but from the bottom up In this way the law

itself comes into focus as that which results from the reasoned jurisprudential reflection on the reality of meanings and actions
