psychology **Insurance and Human Rights** Margarida Lima Rego, Birgit Kuschke, 2022-02-15 This volume examines the impact of and interplay between human rights and insurance National supranational and international legal instruments regulating the taking up and pursuit of the business of insurance and reinsurance re insurance distribution and the insurance contract often refer to or impact on human or fundamental rights Courts are often faced with the sometimes seemingly impossible task of reconciling insurance core principles practices and mind sets with the principles and values stemming from human rights protection In some cases such as that of discrimination in insurance this discussion has been going on for decades Some deal with hot topics which have more recently emerged in light of developments stemming from technologic innovations InsurTech The first part of the book focuses on insurance and the right to equal treatment Discrimination on the basis of factors such as gender or age is tackled from the perspectives of the European Union Canada and South Africa The second part of the book highlights the very relevant role played by insurance in the upholding of the right to health covering the United States of America Africa and Brazil The third part of the book explores InsurTech s manifold challenges upon the right to privacy focusing on European Union The fourth part tackles the threat posed by insurance on the right to life in general but with a particular focus on the United Kingdom Written by legal scholars and practitioners the book offers international comparative and regional or national perspectives aiming to contribute to a more thorough and systematic understanding of the interactions between these two very different fields of law providing the industry as well as the scientific community with insights from both sides of this seemingly difficult to transpose divide Health Financing for Poor People Alexander S. Preker, Guy Carrin, 2004 One of the most urgent development challenges facing many low and middle income countries is the need for adequate financing systems to pay for health care provision to the estimated 1.3 billion impoverished people living in rural areas or working in the informal sector in urban areas This publication considers ways of improving the financing of health care at low income levels as part of a global strategy for increased investment in health and poverty reduction Topics discussed include global and regional trends in healthcare financing strengths and weaknesses of community based health financing and experiences in Asia and Africa country case studies using household survey analysis from Senegal Rwanda India and Thailand deficit financing and the impact of risk sharing on achieving health system goals Normalizing an American Right to Health Christina S. Ho, 2023 Normalizing an American Right to Health argues against the conventional wisdom that a U.S. right to health is out of reach It shows that the necessary change is not extraordinary but familiar and that the law has already laid considerable groundwork in ordinary statutes and case law The book moves from the descriptive task of showing where a right to health already exists in our legal corpus to the prescriptive goal of showing how we could feasibly and meaningfully expand the right through ordinary policies that are widely used in other domains including impact assessments and state sponsored reinsurance Health Insurance Handbook Hong Wang, Kimberly Switlick, Christine Ortiz, Beatriz Zurita, Catherine Connor, 2012-01-18 Many countries that subscribe to the

Millennium Development Goals MDGs have committed to ensuring access to basic health services for their citizens Health insurance has been considered and promoted as the major financing mechanism to improve access to health services as well to provide financial risk protection

Risk and Africa Lena Bloemertz, 2012 Through a range of articles this book explores the changing nature of risk in contemporary African societies It provides a valuable addition to the current debate on the concept of risk which has traditionally been skewed in favor of a European historical experience The contributions illustrate that technological hazards pollution and climate change as well as the introduction of new forms of insurance and the restructuring of civil society are just some of the recent developments that invite us to be skeptical of prevailing notions of risk in the African context The reader is encouraged to move away from focusing on the vulnerability of Africa as a pre modern society to consider more localized and contemporary perspectives of risk In exploring new ways of conceptualizing risk in Africa the book addresses the challenge of making theoretical and methodological advances in risk research relevant to understanding the processes of social change on the continent Series Articles on African Studies Beitrage zur Afrikaforschung Vol 51

Trade in the Service of Sustainable Development Olivier De Schutter, 2015-09-10 In the Bretton Woods era trade liberalization the improvement of labour rights and working conditions and the strengthening of environmental policies were seen as mutually supportive But is this always true Can we continue to pretend to protect the rights of workers and to improve environmental protection particularly through climate change mitigation strategies within an agenda focused on trade liberalization Is it credible to pursue trade policies that aim to expand the volumes of trade without linking such policies to labour and environmental standards seen as non trade concerns This book asks these questions offering a detailed analysis of whether linkage is desirable and legally acceptable under the disciplines of the World Trade Organization WTO It concludes that trade can work for sustainable development but only if we see it as a means for social and environmental progress including climate change mitigation and if we avoid fetishizing it as an end to be pursued for its own sake

developing simplified methods for risk assessment which can help to underwrite risks price the micro health insurance schemes and ensure proper implementation The third issue is formulating a compelling business case which would make this health insurance affordable financially sustainable and operationally scalable This book develops insurance education and financial literacy for students of economics business administration insurance development studies and social work to prepare them for practical work as implementers policymakers or evaluators A supplementary section for teachers and students includes comprehension questions

The Geneva Papers Christophe Courbage,2016-04-29 In January 1976 Raymond Barre the first President of The Geneva Association and Orio Giarini its first Secretary General founded The Geneva Papers on Risk and Insurance with the main goal of supporting and encouraging research in the economics of risk and insurance At that time research in the field of insurance was still embryonic and insurance was regarded as peripheral social activity When sustained economic growth gained traction the function of insurance gradually emerged as a key contributor to economic development By integrating uncertainty into economic theory and benefiting from the progress of both financial economics and decision theory research developed further in the field of insurance economics and risk management and is now prolific The Geneva Papers on Risk and Insurance undeniably contributed to this evolution and its impact on research in insurance has largely exceeded what its two founding members could have expected This volume is a special collection of papers celebrating 40 Years of The Geneva Papers on Risk and Insurance The collection looks back at the storied history of The Geneva Papers on Risk and Insurance and features papers from some of the esteemed authors who have contributed to the journal in its lifetime This collection of papers highlights just a few of the many themes addressed in the papers published by the journal since it was created Nevertheless the selection exemplifies the richness and variety of topics the field of insurance covers
