Handbook of Research on Information Communication Technology Policy: Trends, Issues and Advancements Adomi, Esharenana E.,2010-07-31 The Handbook of Research on Information Communication Technology Policy Trends Issues and Advancements provides a comprehensive and reliable source of information on current developments in information communication technologies This source includes ICT policies a guide on ICT policy formulation implementation adoption monitoring evaluation and application and background information for scholars and researchers interested in carrying out research on ICT policies **Implementing IT governance in the public sector by use of bootstrap algorithms** Petter

Ogland,2017-11-29 It has been argued that the reason seventy percent of all IT projects fail is due to lack of a formal system for guiding and monitoring IT decisions Organisations having explicit IT governance systems are generally twice as successful as those with poor governance given the same strategic objectives but implementing IT governance can be difficult In this book Dr Ogland looks at the public sector and argues that the implementation of IT governance has to be done through bootstrapping The bootstrap algorithm BA is a time tested approach that is known to work but it is an approach that breaks with much of the logic of the public sector bureaucracy and is expected to be met with resistance By analysing patterns in a study of trying to convince a Norwegian public sector organisation to implement IT governance through the use

of the BA the book is able to provide rich insights on what causes failure and how to make the implementation process succeed

Theories, Methods, Practices, and Fields of Digital Social Research Gabriella Punziano, Felice Addeo, Angela Delli Paoli, 2024-07-08 The digital in the form of technologies scenarios objects processes and relational and interactional structures is increasingly becoming central to understanding culture society human experience and the social world It permeates our society's practices symbols and

shared meanings and it makes old distinctions such as the one between online and offline real and virtual and material and immaterial obsolete. It also introduces digitally native objects of research such as cyber bullying and digital identities which have a direct impact on mainstream sociological problems.

Information Communication Technology and Social Transformation Hugh F. Cline, 2014-02-05 This book argues that information communication technologies are not creating new forms of social structure but rather altering long standing institutions and amplifying existing trends of social change that have their origins in ancient times. Using a comparative historical perspective it analyzes the applications of information communication technologies in relation to changes in norms and values, education institutions, the socialization of children, new forms of deviant and criminal behaviors, enhanced participation in religious activities, patterns of knowledge creation and use, the expansion of consumerism and changing experiences of distance and time.

Mobile Computer Usability Gamel O. Wiredu, 2013-11-19 This book explains how mobile computer usability is shaped by the increasing integration of personal circumstances in organization. It represents an attempt to conceptualize an alternative model of mobile computer usability. It is motivated by the author's conviction that we do not yet have an adequate understanding of this concept because we have not taken seriously the transformation of human personality by the co-evolution of organization and ICTs. The author argues that the transformation has resulted in a human personality whose personal and organizational activities are characterized by strong continuities between them. This characterization reflects a new kind of personality of the worker and is a critical determinant of mobile computer usability. The word organizational is used to describe this kind of personality, hence an alternative organizational personality perspective on mobile computer usability. This perspective suggests that a mobile computer is more usable to a person than another one because of its satisfaction of both his personal and organizational motives which are in turn shaped by the co-evolution of organization, technology and personality.
