Sociological Perspectives Volume 42 No1:

Social Capital Versus Social Theory Ben Fine, 2002-05-03 The idea of Social Capital is an attempt to incorporate social considerations into mainstream economic thinking Its proponents feel that social factors are properly quantifiable So they use the complex algebra and statistics beloved of mainstream economic theory and measure units of health care or education in the same way that they would machinery or transport Ben Fine's main argument in this book is that such concerns cannot be judged in terms of mathematical methods and that to try to do so is overly simplistic Fine assesses the impact of Social Impact across the social sciences and shows how economic analysis is being subsumed into these areas and how thinking in sociology and politics impacts upon economics

Japanese Women and Sport Robin Kietlinski, 2011-01-01 Japanese Women and Sport aims to explore both why and how in the past century athletics have stood out as an arena in which excellence by Japanese women is so actively encouraged

Biological Economies Richard Le Heron, Hugh Campbell, Nick Lewis, Michael Carolan, 2016-01-22 Recent agri food studies including commodity systems the political economy of agriculture regional development and wider examinations of the rural dimension in economic geography and rural sociology have been confronted by three challenges These can be summarized as more than human approaches to economic life a post structural political economy of food and agriculture and calls for more enactive performative research approaches This volume describes the genealogy of such approaches drawing on the reflective insights of more than five years of international engagement and research It demonstrates the kinds of new work being generated under these approaches and provides a means for exploring how they should be all understood as part of the same broader need to review theory and methods in the study of food agriculture rural development and economic geography This radical collective approach is elaborated as the Biological Economies approach The authors break out from traditional categories of analysis reconceptualising materialities and reframing economic assemblages as biological economies based on the notion of all research being enactive or performative

Advances in Sociology Research Leopold M. Stoneham, 2004 Presents original research results on the leading edge of sociology Each chapter has been carefully selected in an attempt to present substantial advances across a broad spectrum

Trust, Politics and Revolution Francesca Granelli, 2019-12-04 Tracing the relationships and networks of trust in Western European revolutionary situations from the Ancient Greeks to the French Revolution and beyond Francesca Granelli here shows the essential role of trust in both revolution and government arguing that without trust both governments and revolutionary movements are liable to fail The first study to combine the importance of trust and the significance of revolution this book offers a new lens through which to interpret revolution in an essential work book for all scholars of political science and historians of revolution

Unintended Consequences Deepak Lal, 2001 In this book based on the 1995 Ohlin Lectures Deepak Lal provides an accessible interdisciplinary account of the role of culture in shaping economic performance Topics addressed include a possible future clash of civilizations the role of Asian values in the East

Asian economic miracle the cultural versus economic causes of social decay in the West and whether modernization leads to Westernization Lal makes an important distinction between material and cosmological beliefs showing how both were initially shaped by factor endowments and how they have evolved in response to changing historical pressures in different civilizations Lal s first major theme is the interaction of factor endowments culture and politics in explaining modern intensive growth in the West The other major theme is the role of individualism an inadvertent legacy of the medieval Catholic Church in promoting this growth and the strange metamorphoses this has caused in both the West s cosmological beliefs and the interaction between the West and the rest Lal takes account of the relevant literature in history anthropology social psychology evolutionary biology neurology and sociology and the economic history of the regions and cultures that form Eurasia An appendix shows how the stories Lal tells can be described by four formal economic models **ICGR 2023**

Commission on Population Growth and the American Future,1970 Accounting the Future Ivanche Dimitrievski,2019-05-27 The thesis investigates the social processes involved in the practices of futuring It addresses the question of how social practices contribute to the production and maintenance of robust versions of the future It asks how best we should study futurity including expectations imaginations promises and visions Existing research tells us rather little about how ordinary practices render the future as a particular publicly available and accountable presence or absence In what ways do people achieve situated performances of certainty about the future The thesis addresses these questions by drawing upon recent theoretical themes in Science and Technology Studies STS notably accountability relations and mundane practices in science and technology The empirical focus of the thesis is an extended ethnographic study of the European Spallation Source ESS a major neutron based science research facility currently under construction in Lund Sweden The methods used are a combination of participant observation interviews documentary analysis and ethnomethodologically inflected textual analysis The thesis reports findings in relation to each of four aspects of ESS work 1 the textual practices rendering the future of the ESS in local newspaper coverage 2 documentary analysis of a 2014 2015 Call for ESS Instrument Proposals 3 observations from visits to ESS and participation in staged future walks and 4 the mundane laboratory practices of measuring thickness in an ESS Detector Coatings Workshop in Linköping The results of these empirical analyses are used to argue for the importance of generating and sustaining accountability relations in

futuring practices for understanding how the future is imagined and made to come about The thesis concludes that looking at practices in this way has political implications among other things it allows to see how agency and capability to affect the future is distributed built eroded and attributed

Ethical Trade, Gender and Sustainable Livelihoods Kiah Smith, 2014-03-21 Fair and ethical trade is often criticized for being highly gendered and for institutionalizing the ethical values of consumers the priorities of NGOs and governments and most of all food retailers But little is known about how women smallholder farmers experience diverse ethical standards or whether and how standards reflect their values local cultural and environmental contexts or priorities for achieving sustainable livelihoods Linking gender smallholder livelihoods and global ethical trade regulations this book reveals that multiple understandings of social justice environmental sustainability and well being or ethicality exist in parallel to those institutionalized in ethical trade schemes Through an in depth case study of smallholder subsistence and French bean farming in Kenya the book grounds the analysis of livelihoods gender and ethical trade in women smallholders perspectives links the macro level of markets with the micro level of livelihoods and engenders relations of power structure and agency in food networks It brings together disparate bodies of theory to illustrate the knowledge strategies and values of women smallholder farmers that are often beyond the scope of ethical trade regulations It also provides a challenging new vision for doing food systems research

Global Turbulence Marjorie Griffin Cohen, Stephen McBride, 2003 States and social activists alike face a turbulent global political economy as they seek to confront new challenges with new strategies The same is true of academic disciplines that seek to track discontinuities in old certainties and analyze emerging agendas action identities and space In contrast to approaches which argue that the new global order is simply a fact of life impervious to political challenge the contributors to this book emphasize that it is highly contested States retain considerable power even if much of it has been directed to constructing globalization rather than modifying its effects and disadvantaged groups even the most apparently marginalized have managed to win improvements in their condition The book draws attention to the state of flux

that characterizes contemporary political economy both in theory and practice Useful for senior undergraduate and graduate students in political economy international relations political science and sociology
