

- Sociological reasoning predates the foundation of the discipline. Social analysis has origins in the common stock of Western knowledge and practice and has been carried out from as early as the time of Plato if not before. The origin of the survey, i.e., the collection of information from a sample of individuals, can be traced back at least early as the Domesday Book in 1086, while ancient philosophers such as Confucius wrote on the importance of social roles.

Sociological Reasoning:

Sociological Reasoning Jean Claude Passeron, 2013 Sociological Reasoning is a classic study in sociology and philosophy by a leading French intellectual and the co author of several influential works with Pierre Bourdieu from 1964 to 1970 Jean Claude Passeron's book was first published in 1991 and in a second revised and extended edition in 2006 from which this book is translated Passeron argues that to recognise sociology to be scientific involves situating it as an in between science neither reduced to the perceptions contained in the narratives of individuals nor generating a historical truths of human behaviour in society

Sociological Reasoning Rob Stones, 1996-07-03 While sociological modernists were outrageously presumptuous in their claims for sociological knowledge postmodernists have gone to another extreme in claiming that it has no more truth status than fiction Critical of both positions Sociological Reasoning develops an original typology of approaches to social scientific theory and research which is distinguished by its openness and reflexive awareness of rhetorical and methodological aspects of knowledge claims Laced with graphic illustrative examples this is a strikingly well written text that will appeal to students at undergraduate level and beyond

Origins of Sociological Theory Arris Dorsey &,2018-11-30 The field of sociology itself and sociological theory by extension is relatively new Both date back to the 18th and 19th centuries The drastic social changes of that period such as industrialization urbanization and the rise of democratic states caused particularly Western thinkers to become aware of society The oldest sociological theories deal with broad historical processes relating to these changes Since then sociological theories have come to encompass most aspects of society including communities organizations and relationships The basic insight of sociology is that human behaviour is largely shaped by the groups to which people belong and by the social interaction that takes place within those groups The main focus of sociology is the group not the individual This compendium offers selections that present special propositions specific concepts or examples of substantive theorizing rather than discussions of integrated systems The present attempt is made to describe the different aspects of sociological theory generally being explained by the social scientists and it is hoped that it will be of great use for all those concerned with sociology

Ethnomethodological Studies of Work Harold Garfinkel,2005-09-26 This unique collection will be essential reading for all researchers and students doing courses in ethnomethodology organization studies and the sociology of work

Social Science, Technical Systems, and Cooperative Work Geoffrey Bowker,Susan Leigh Star,Les Gasser,William Turner,2014-05-12 This book is the first to directly address the question of how to bridge what has been termed the great divide between the approaches of systems developers and those of social scientists to computer supported cooperative work a question that has been vigorously debated in the systems development literature Traditionally developers have been trained in formal methods and oriented to engineering and formal theoretical problems many social scientists in the CSCW field come from humanistic traditions in which results are reported in a narrative mode In spite of their differences in style

the two groups have been cooperating more and more in the last decade as the people problems associated with computing become increasingly evident to everyone The authors have been encouraged to examine rigorously and in depth the theoretical basis of CSCW With contributions from field leaders in the United Kingdom France Scandinavia Mexico and the United States this volume offers an exciting overview of the cutting edge of research and theory It constitutes a solid foundation for the rapidly coalescing field of social informatics Divided into three parts this volume covers social theory design theory and the sociotechnical system with respect to CSCW The first set of chapters looks at ways of rethinking basic social categories with the development of distributed collaborative computing technology concepts of the group technology information user and text The next section concentrates more on the lessons that can be learned at the design stage given that one wants to build a CSCW system incorporating these insights what kind of work does one need to do and how is understanding of design affected The final part looks at the integration of social and technical in the operation of working sociotechnical systems Collectively the contributors make the argument that the social and technical are irremediably linked in practice and so the great divide not only should be a thing of the past it should never have existed in the first place

Reflexivity And The Crisis of Western Reason Barry Sandywell, 2013-06-17 This ground breaking work explores the genealogical analysis of the discourses of reflection Barry Sandywell traces the differences between the traditional discourses of reflection and the experiences of reflexivity in everyday social and philosophical thought Brilliantly organised and abounding with astonishing insights Reflexivity and the Crisis of Western Reason offers a fundamental challenge to our normal ways of viewing social thought

The Antinomies of Classical Thought: Marx and Durkheim (Theoretical Logic in Sociology) Jeffrey Alexander, 2014-04-24 This volume challenges prevailing understanding of the two great founders of sociological thought In a detailed and systematic way the author demonstrates how Marx and Durkheim gradually developed the fundamental frameworks for sociological materialism and idealism While most recent interpreters of Marx have placed alienation and subjectivity at the centre of his work Professor Alexander suggests that it was the later Marx's very emphasis on alienation that allowed him to avoid conceptualizing subjectivity altogether In Durkheim's case by contrast the author argues that such objectivist theorizing informed the early work alone and he demonstrates that in his later writings Durkheim elaborated an idealist theory that used religious life as an analytical model for studying the institutions of secular society

The Ethnomethodology Program Douglas W. Maynard, John Heritage, 2022 It's been more than fifty years since Harold Garfinkel created the field of ethnomethodology a discipline that offers a new way of understanding how people make sense of their everyday world Since his book *Studies in Ethnomethodology* published in 1967 there has been a substantial although often subterranean growth in ethnomethodological EM work Studies in and appreciation of ethnomethodological work continue to grow but the breadth and penetration of his insights and inspiration for ongoing research have yet to secure their full measure of recognition This volume celebrates Harold Garfinkel's enormous

contributions to sociology and conversation analysis exploring how ethnomethodology emerged the empirical consequences of Garfinkel's work and the significant contemporary work that has resulted from it Douglas W Maynard and John Heritage bring together experts from a wide range of theoretical and empirical areas to create the first comprehensive collection of work on EM that encompasses its role in studies of work in Conversation Analysis and in other subdisciplines Chapters highlight ethnomethodology's distinctive forms of ethnographic inquiry and its influences on a host of substantive domains including legal environments science and technology workplace and organizational inquiries survey research social problems and deviance and disability and atypical interaction The book explains how EM especially helped to set the agenda for gender studies while also developing insights for inquiries into racial and ethnic features of everyday life and experience Still there is much of what Garfinkel called unfinished business which means that ethnomethodological inquiries are continuing to intensify and develop Harold Garfinkel and Ethnomethodology addresses this unfinished business not only drawing attention to past accomplishments in the field but also suggesting how these accomplishments set the stage for future endeavors that will benefit from EM inspired approaches to social organization and interaction *Sociology, Ethnomethodology and Experience* Mary F. Rogers, 1983-11-25 In this volume first published in 1983 Professor Rogers examines the usefulness of a phenomenological approach to sociology Her broad purpose is to demonstrate the theoretical and methodological advantages phenomenological sociology holds Thus she offers a selective introductory exposition of phenomenology highlighting its relevance for social scientists and undercutting the notion of phenomenology as a non scientific subjective or esoteric method of study [A Critique of Sociological Reasoning](#) Charles W. Rationality, Education and the Social Organization of Knowledge (RLE Edu L) Chris Jenks, 2013-06-17 The manner in which we variously come to an understanding of our world presents problems for us all but the unified method by which we ought best to acquire such knowledge represents the particular problem of contemporary education This important book seeks to explore some of the underlying practises and assumptions that go to produce and sustain both such sets of activities As a result of its concerns with the social organization of knowledge at all levels the sociology of education has become a central form of much contemporary sociological theory All the papers in this collection are formulations of a

reflexive method of theorizing within sociology of education This is a mode of address deriving partly from social phenomenology which seeks to display the grounds of the theorists speech as itself an essential feature of any informative dialogue Major themes in education and in sociology are considered in this way including the social form of rationality the constitution of curricula normative beliefs about Learning the nature of literary study as liberal education and the character of scientific knowledge in the social world

Colonialism and Modern Social Theory Gurminder K. Bhambra, John Holmwood, 2021-05-18 Modern society emerged in the context of European colonialism and empire So too did a distinctively modern social theory laying the basis for most social theorising ever since Yet colonialism and empire are absent from the conceptual understandings of modern society which are organised instead around ideas of nation state and capitalist economy Gurminder K Bhambra and John Holmwood address this absence by examining the role of colonialism in the development of modern society and the legacies it has bequeathed Beginning with a consideration of the role of colonialism and empire in the formation of social theory from Hobbes to Hegel the authors go on to focus on the work of Tocqueville Marx Weber Durkheim and Du Bois As well as unpicking critical omissions and misrepresentations the chapters discuss the places where colonialism is acknowledged and discussed albeit inadequately by these founding figures and we come to see what this fresh rereading has to offer and why it matters This inspiring and insightful book argues for a reconstruction of social theory that should lead to a better understanding of contemporary social thought its limitations and its wider possibilities

Law in Action Max Travers, John F. Manzo, 2016-12-05 Ethnomethodologists and Conversation Analysts have always been interested in the study of law and legal institutions and there is now a large body of empirical studies representing a range of analytic traditions in each field This collection introduces this literature and the research questions pursued by ethnomethodologists and conversation analysts in an accessible form to a general audience in the interdisciplinary field of law and society studies
