In the Footsteps of the Traveller Chris M. Cannon, 2025-04-10 Teachings from the stars Much more than stories about the sky Indigenous astronomies provide powerful centuries old models of knowing being and relating to the world Through collaboration with more than sixty five Dene Elders and culture bearers across thirty four communities in Alaska and Canada In the Footsteps of the Traveller reveals the significance of the stars to Northern Dene life language and culture At the centre of these knowledge systems is the Traveller a being who journeyed around the world in Ancient Time before incarnating among the stars The Traveller constellation is a teacher a gamekeeper a guardian and a practical guide for wayfinding The Traveller together with a host of other celestial and atmospheric phenomena like thunder and the northern lights bridges the divide between earth and sky instilling balance and instructing people on how to live with each other and their environments This study combines interviews stunning photographs and detailed illustrations of the northern night sky author Chris M Cannon's own experiential learning and a foreword from Chief Fred Sangris of Yellowknives Dene First Nation Rooted in years of collaborative fieldwork In the Footsteps of the Traveller leads the way to deeper understandings of Northern Dene astronomical knowledge

MANNER OF THE SUNDG Ted Cabana, 2013-11 Nearing the end of the 21st century the world has been devastated by catastrophic climate change war disease and overpopulation Now the most sought after of all continents to live Antarctica has developed into a vastly inhabited and civilized oasis with its own cities communities cultures and native population known as the Annortics Still under the control of the United Nations Consultative Parties this utopian society established in the exclusive city of Ellsworth is governed by an international coalition of scientists known as ICS more simply referred to as ICE The governing laws have been set in accordance with the Antarctic treaty which has continued to ban any exploitation of its prized resources for over a century But the tyrannical global corporation known as GRANT has

begun to manipulate extort and even assassinate key party members in order to take control of the most magnificent frontier on the planet for their own self indulgence With the recent discovery of an ancient and highly elusive Nazi military installment members of GRANT s abducted science team have learned to develop and exceed the technology that would have allowed the Third Reich to conquer the world during WWII Together with their covert elite force known as the Lynx they will use this technology of an unknown origin to once again continue the pursuit of absolute power In its capital city of Ellsworth young physics prodigy Bane Elrick is drawn into conflict between Antarctica s own governing body the International Coalition of Science and GRANT a powerful global organization that has seized control of the world s economy and now desires to take control of the planet s last frontier Antarctica After inadvertently learning of its profound history and dark secrets Bane is forced to make decisions that will impact his future while struggling to save his loved ones from losing the only home they have ever known to GRANT Bane is guided by his mentor Dr Pierce G del president of the Coalition and a renowned geneticist who lives confined to his self made endodermic suit which allows his paralyzed body to continue functioning as normal while preparing his revenge on GRANT for their failed assassination attempt which claimed the lives of his beloved wife and daughters Under his preceptor world renowned physicist Professor Sergei Isen Bane learns of an intangible and extremely valuable isotope that can be used dynamically for inter stellar travel anti gravity propulsion or as a powerful weapon against all civilization Throughout his adventure Bane learns the uglier side of politics science and life from his friends mentors and his father Marlin Elrick an architectural engineer who tries to guide him toward a more prosperous future The ghostly memoirs of his deceased mother a paleo geologist lead him as he recalls her cryptic cyphers from his childhood to unravel the secrets of Antarctica s history and his own destiny Markus Blackmore a former UN Special Forces agent and commander of the Antarctic Regional Guard shows Bane the darker side of humanity and how to fight for what he believes in His nomadic neighbor Donnar McKinley a wise but eccentric old man advises him through troubled times with what at first seems to be equivocal nonsense All the while being driven by his passion for science his native land and his love for an esteemed politician s daughter Bane relates his tale to a new denizen of Ellsworth sharing his accounts of early life and adventures as a scientist where he was born and raised and his rise to leadership of the world s most intriguing continent and sovereign nation of its own Antarctica

The AMS Weather Book Jack Williams, 2013-04-05 America has one of the most varied and dynamic weather systems in the world Every year the Gulf Coast is battered by hurricanes the Great Plains are ravaged by tornados the Midwest is pummeled by blizzards and the temperature in the Southwest reaches a sweltering 120 degrees Extreme weather can be a matter of life and death but even when it is pleasant 72 degrees and sunny weather is still central to the lives of all Americans Indeed it's hard to imagine a topic of greater collective interest Whether we want to know if we should close the storm shutters or just carry an umbrella to work we turn to forecasts But few of us really understand the science behind them All that changes with *The AMS Weather Book* The most comprehensive and up to date guide to our weather and our atmosphere it is the ultimate resource for anyone

who wants to understand how hurricanes form why tornados twirl or even why the sky is cerulean blue Written by esteemed science journalist and former USA Today weather editor Jack Williams The AMS Weather Book covers everything from daily weather patterns to air pollution and global warming and explores the stories of people coping with severe weather and those who devote their lives to understanding the atmosphere oceans and climate Words alone of course are not adequate to explain many meteorological concepts so The AMS Weather Book is filled with engaging full color graphics that explain such concepts as why winds blow in a particular direction how Doppler weather radar works what happens inside hurricanes how clouds create wind and snow and what s really affecting the earth s climate For Weather Channel junkies amateur meteorologists and storm chasers alike The AMS Weather Book is an invaluable tool for anyone who wants to better understand how weather works and how it affects our lives *Superstitions* William Carroll,1998 *Sky Illusions* Kaia Stonebrook,AI,2025-02-19 *Sky Illusions* explores the captivating world of atmospheric optics revealing the science behind phenomena like shimmering halos and mirages These aren t mere tricks of light but real occurrences influenced by atmospheric conditions The book delves into how ice crystals create halos and sun dogs through light refraction and how temperature gradients cause mirages bending light to create illusions of water or displaced objects Understanding these sky illusions offers insights into weather patterns and the atmosphere s composition The book begins with the basic properties of light and atmospheric elements then progresses through halos mirages and other intriguing illusions like glories and coronas It connects these phenomena to physics meteorology and geography demonstrating how observing these illusions can provide valuable information about atmospheric conditions This approach allows readers to not only understand the science but also to identify and interpret these phenomena enhancing their appreciation of the natural world *Sky Illusions* uniquely combines scientific explanations with practical observation making complex concepts accessible The book s value lies in its ability to transform casual sky observation into informed interpretation aiding in weather forecasting and deepening our understanding of the environment **Moon Halo** Kaia Stonebrook,AI,2025-02-19 *Moon Halo* explores the captivating science behind lunar and solar halos those luminous rings we sometimes see around the Moon or Sun These optical illusions are created by light interacting with ice crystals in the atmosphere One intriguing fact is that the specific shape and orientation of these ice crystals determine the type of halo formed such as the common 22 halo or sun dogs Understanding these atmospheric phenomena offers a window into weather patterns and the physics of light refraction demonstrating how light bends as it passes through icy prisms The book uniquely bridges theoretical physics with practical observation encouraging readers to participate in documenting and studying halos It begins with meteorological principles and light properties then identifies common halo types explaining the ice crystal formations and atmospheric conditions behind each Using photographs and observational data it provides a guide for identifying halos in nature This approach makes complex scientific concepts accessible to a broad audience interested in Earth Sciences Geography By understanding atmospheric

conditions and ice crystal morphology we gain valuable insights into our atmosphere

The Memory of Water Allen

Smutylo, 2014-06-19 Over the last forty years Canadian adventurer writer and artist Allen Smutylo has experienced some of the wildest and most captivating waters imaginable in all corners of the globe The stories in *The Memory of Water* all of them accompanied by the author's own stunning artwork describe his adventures in the Arctic South Pacific Great Lakes region and India In the Arctic he is attacked by a polar bear stalked by a rogue walrus and nearly drowns in ferocious waters But his Arctic stories also celebrate human creativity as they recount the life of the pre Inuit people who hunting in a changing environment endured many hardships and developed new technologies such as the sea kayak to cope Other stories include an account of a sojourn in a small Georgian Bay fishing village as a young artist an adventure on an urban river in southwestern Ontario and a portrayal of the complex underwater world of the South Pacific Travelling the River Ganges in India the author finds that a massive misuse of water is complicated by a billion people's faith based adoration of the same water *The Memory of Water* probes a crucial and contemporary issue that of our relationship to water and the wildlife and human life that depends upon it This book will appeal to anyone interested in the natural world in artistic depictions of it or in a good story well told

Lights in the Sky Michael Maunder, 2007-11-07 Many lights and other objects in the sky go unrecognised or at least are little understood by those observing them Such things range from the commonplace like rainbows and meteors to the distinctly unusual like the green flash and ball lightning And there is still a residuum of objects that remain unidentified by the watcher classed generally as UFOs a description which today has connotations of the mysterious even of extraterrestrial visitors The first part of this book is an identification guide very much like the plant identifier sections found in a good gardening or botany book It allows quick and structured identification of known aerial phenomena whether at night or during the day The objects thus found are referenced to the second part of the book The second part gives a full description physical explanation and where relevant notes on observing and photographing the various phenomena Some will need optical aids such as binoculars or telescopes but the main thrust of the book is identification and explanation rather than imaging The final chapter approaches UFOs from a scientific standpoint particularly the way in which human perception and often preconception affects the outcome It does however finish with a short section on extraterrestrial UFOs emphasising the burden of proof aspect and touching on the scientific theories of life on other worlds and the improbability of visitors
