Women and Employment in Public Policy Susan Milner, 2024-07-20

In the UK women's economic empowerment through employment is a success story of the last three decades. And yet women are over-represented in low-paid insecure jobs, are under-represented in top jobs and earn less than men on average with a marked income gap over the lifecycle. When Labour took office in 1997 a new wave of women MPs entered parliament in record numbers and women gained access to ministerial roles including a newly created minister for women. However policy on women and employment remained an area of conflict. New rights were secured particularly for mothers but when Labour left office a sizeable policy agenda remained unfinished. Using documentary evidence and interviews from leading policy actors from the period *Women and Employment in Public Policy* takes as its starting point the Women and Work Commission which was convened in 2004 to examine causes of the gender pay gap. The commission was unable to defuse conflicts over equal pay but it set out an agenda for change at the level of government, private sector work organizations and public sector organizations. Milner examines why the commission could not resolve key conflicts and why its broad-based recommendations were only partially taken up. She traces the subsequent development of policy observing well-established preferences for light touch regulation which can raise awareness but leave entrenched practices unchallenged and weaken individual women's access to redress. Detailed study of the working of the commission provides lessons on the policy process particularly for those seeking to influence policy. It also shows that within the wider policy space opportunities for action to effect change are possible based on appeals to instrumental logic or political exchange but are constrained by party leadership.

The Last Oil Shock David Strahan, 2011-08-04 This may be the most important book you or anyone else will read in the next fifty years. Assuming humanity survives that long. Draining the lifeblood of industrial civilization the terminal decline of oil and gas production will spark a crisis far more dangerous than international terrorism and more urgent than climate change. World leaders know it so why aren't they telling? The last oil shock is the secret behind the crises in Iraq and Iran the reason your gas bill is going through the roof the basis of a secret deal cooked up in Texas between George Bush and Tony Blair the cause of an imminent and unprecedented economic collapse and the reason you may soon be kissing your car keys and boarding pass goodbye. David Strahan explains how we reached this critical state how the silence of governments oil companies and environmentalists conspires to keep the public in the dark what it means for energy policy and what you can do to protect yourself and your family from the ravages of the last oil shock.

wishes of the product manufacturer service provider or customer When the author defined this phenomenon as Obstructive Marketing and started to research it more than a decade ago it was seen as a valid concept that was perhaps ahead of its time The World has moved on and in the era of globalization a study of this negative aspect of marketing is now required Obstructive Marketing is now seen as the business equivalent of asymmetric warfare which is increasingly understood because the rise of the South and East at the expense of the North and West has brought some Obstructive Marketing stratagems into sharp focus Using the author's own research this book explains what Obstructive Marketing is and why it is not called Anti Marketing The author explains who practises Obstructive Marketing where when and how and why businesses are particularly vulnerable when entering new markets and engaging in change and innovation Intriguing concepts such as cultural risk are illuminated along with formal links between Obstructive Marketing asymmetric warfare and terrorism This all leads to identification of the need for a strong Government Business partnership to counter the effects of this darkest kind of marketing
