World War 3.0 Ken Auletta,2001-02-15 The Internet Revolution like all great industrial changes has made the world s elephantine media companies tremble that their competitors whether small and nimble mice or fellow elephants will get to new terrain first and seize its commanding heights In a climate in which fear and insecurity are considered healthy emotions corporate violence becomes commonplace In the blink of an eye or the time it has taken slogans such as The Internet changes everything to go from hyperbole to banality creative destruction has wracked the global economy on an epic scale No one has been more powerful or felt more fear or reacted more violently than Bill Gates and Microsoft Afraid that any number of competitors might outflank them whether Netscape or Sony or AOL Time Warner or Sun or AT T or Linux based companies that champion

the open source movement or some college student hacking in his dorm room Microsoft has waged holy war on all foes leveraging its imposing strengths In World War 3 0 Ken Auletta chronicles this fierce conflict from the vantage of its most important theater of operations the devastating second front opened up against Bill Gates s empire by the United States government The book s narrative spine is United States v Microsoft the government s massive civil suit against Microsoft for allegedly stifling competition and innovation on a broad scale With his superb writerly gifts and extraordinary access to all the principal parties Ken Auletta crafts this landmark confrontation into a tight character and incident filled courtroom drama featuring the best legal minds of our time including David Boies and Judge Richard Posner And with the wisdom gleaned from covering the converging media software and communications industries for The New Yorker for the better part of a decade Auletta uses this pivotal battle to shape a magisterial reckoning with the larger war and the agendas personalities and prospects of its many combatants *How to Cool the Planet* Jeff Goodell, 2010-04-15 Thoughtful informative and darkly entertaining It s the best treatment of this important and scary topic you can find Elizabeth Kolbert Right now a group of scientists is working on ways to minimize the catastrophic impact of global warming But they re not designing hybrids or fuel cells or wind turbines They re trying to lower the temperature of the entire planet And they re doing it with huge contraptions that suck CO2 from the air machines that brighten clouds and deflect sunlight away from the earth even artificial volcanoes that spray heat reflecting particles into the atmosphere This is the radical and controversial world of geoengineering which only five years ago was considered to be fringe But as Jeff Goodell points out the economic crisis combined with global political realities is making these ideas look sane even inspired Goodell himself started out as a skeptic concerned about tinkering with the planet s thermostat We can t even predict next week s weather so how are we going to change the temperature of whole regions What if a wealthy entrepreneur shoots particles into the stratosphere on his own Who gets blamed if something goes terribly wrong And perhaps most disturbing what about wars waged with climate control as the primary weapon There are certainly risks but Goodell believes the alternatives could be worse In the end he persuades us that geoengineering may just be our last best hope a Plan B for the environment His compelling tale of scientific hubris and technical daring is sure to jump start the next big debate about the future of life on earth Goodell explores with infectious curiosity and thoughtful narration this strange promising and untested suite of climate fixes BusinessWeek A quick enjoyable read through a complex timely topic And after you read it you ll never look at the sky or the ocean or Earth really in quite the same way again The Christian Science Monitor *Seductions of Place* Carolyn L.
