we include two models for learning choral literature The first is a Performance Through Sound Analysis model for understanding Commercial Global Folks and arrangement The second is a Performance Through Sound Analysis and Notation model for learning classical music and recently composed music Both models delineate an approach to teaching a choral work that significantly improves students musicianship while at the same time engages the ensemble in learning the overall composition in partnership with the conductor The final chapter of the book includes rubrics to assess the effectiveness of a choral program This book does not purport to be a comprehensive choral pedagogy text It is a detailed guide to helping choral directors at all levels improve the choral singing and musicianship of their students from a Kod ly perspective We hope that this book serves as a resource for choral directors and inspire further conversations and dialogue concerning the application of the Kod ly perspective to choral singing The research for these publications is not presented as exhaustive nor conclusive it is offered as a foundation We encourage our colleagues in the field to continue to add to this research
