Technethics Christian Mission In An Age Of Technology:

Technethics Norman J. Faramelli, 1971 Theology and Technology, Volume 1 Carl Mitcham, Jim Grote, Levi Checketts, 2022-07-21 Originally published nearly forty years ago as a spiritual successor to Carl Mitcham and Robert Mackey's *Philosophy and Technology* the essays collected in the two volumes of *Theology and Technology* span an array of theological attitudes and perspectives providing sufficient material for careful reflection and engagement The first volume offers five general attitudes toward technology based off of H. Richard Niebuhr's five ideal types in *Christ and Culture* The second volume includes biblical historical and modern theological engagements with the place of technology in the Christian life This ecumenical collection ranges from authors who enthusiastically support technological development to those cynical of technique and engages the Christian tradition from the church fathers to recent theologians like Bernard Lonergan and Jacques Ellul Taken together these essays some reproductions of earlier work and others original for this project provide any student of theology a fitting entrance into considering the place of technology in the realm of the sacred *Theology and Technology, Volume 2* Carl Mitcham, Jim Grote, Levi Checketts, 2022-07-20 Originally published nearly forty years ago as a spiritual successor to Carl Mitcham and Robert Mackey's *Philosophy and Technology* the essays collected in the two volumes of *Theology and Technology* span an array of theological attitudes and perspectives providing sufficient material for careful reflection and engagement The first volume offers five general attitudes toward technology based off of H. Terlizzese, 2005-10-30 Hope expresses more than an area of concentration in Ellul's thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our thinking and lives To understand hope we must first comprehend its absence This entails discerning what causes the absence of hope namely the world's embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the

face of these facts From this tension will issue personal resolve Technique has brought the world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul's thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction

Trajectory of the 21st Century Lawrence J. Terlizese, 2009-01-10

Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their positions and draw certain logical conclusions from them that pertain to the course of history in our time The book's theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will mean the twilight of modern technological society as its values of rationalism give way to a post-rationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentality New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of technological progress and regress are on a direct collision course in the twenty first century

The Greening of Protestant Thought Robert Booth Fowler, 2000-11-09

The Greening of Protestant Thought traces the increasing influence of environmentalism on American Protestantism since the first Earth Day which took place in 1970 Robert Booth Fowler explores the extent to which ecological concerns permeate Protestant thought and examines contemporary controversies within and between mainline and fundamentalist Protestantism over the Bible's teachings about the environment Fowler explores the historical roots of environmentalism in Protestant thought including debates over God's relationship to nature and the significance of the current environmental crisis for the history of Christianity Although he argues that mainline Protestantism is becoming increasingly green he also examines the theological basis for many fundamentalists' hostility toward the environmental movement In addition Fowler considers Protestantism's policy agendas for environmental change as well as the impact on mainline Protestant thinking of modern eco-theologies process and creation theologies and ecofeminism

The Church's Public Role Dieter T. Hessel, 2002-01-24

Privilege and Prophecy Robert Tobin, Robert Benjamin Tobin, 2022

The Episcopal Church has long been regarded as the religion of choice among America's ruling elite Yet after World War II a new generation of leaders emerged eager to shake off the church's reputation as a bastion of

privilege and transform it into an agent of social reform Taking an active part in the civil rights and anti war movements of the 1960s these leaders struggled to draw the church s membership into their vision of change Despite their shortcomings these activist leaders played a pivotal role in the evolution of Episcopalianism from establishment church into a more diverse and inclusive denomination
