common sense makes it seem to be something quite different from that reality How can this grand illusion be explained That is the purpose of this book As the authors show unraveling the secrets of the grand illusion of reading teaches about far more than reading itself but also about how remarkable human language is how the brain uses language to navigate the world what it means to be human Each author brings a different perspective but all share a common view of the reading process Together they provide a clear and surprising exposition of the reading process in which they involve readers of this book in exploring the ways they themselves read and make sense of written language while their eyes fixate on fewer than 70 percent of the words in the text In addition the authors engage in a cross disciplinary discussion about how readers use the brain eyes and language in reading The different perspectives provide depth to the authors description of reading The information presented in this book will be new to many teachers researchers teacher educators and the public alike The final chapter draws on the understandings from the book to challenge the treatment of reading and writing as school subjects and offers the basis for supporting literacy development as a natural extension of oral language development *Reports*

*Presented to the General Assembly ... Rhode Island,1922 **Reading Sounds** Sean Zdenek,2015-12-23* Imagine a common movie scene a hero confronts a villain Captioning such a moment would at first glance seem as basic as transcribing the dialogue But consider the choices involved How do you convey the sarcasm in a comeback Do you include a henchman s muttering in the background Does the villain emit a scream a grunt or a howl as he goes down And how do you note a gunshot without spoiling the scene These are the choices closed captioners face every day Captioners must decide whether and how to describe background noises accents laughter musical cues and even silences When captioners describe a sound or choose to ignore it they are applying their own subjective interpretations to otherwise objective noises creating meaning that does not necessarily exist in the soundtrack or the script Reading Sounds looks at closed captioning as a potent source of meaning in rhetorical analysis Through nine engrossing chapters Sean Zdenek demonstrates how the choices captioners make affect the way deaf and hard of hearing viewers experience media He draws on hundreds of real life examples as well as interviews with both professional captioners and regular viewers of closed captioning Zdenek s analysis is an engrossing look at how we make the audible visible one that proves that better standards for closed captioning create a better entertainment experience for all viewers *The Role of Letter-Speech Sound Integration in Typical and Atypical Reading Development*
