chronicles the emergence of a new musical reality between the fifteenth and sixteenth centuries a reality in which beauty and the complementary idea of celestial harmony were gradually replaced by concepts of expressivity and emotion that is to say by a form of idealism that was ontologically more subjective than the original Pythagorean and Platonic metaphysics **The Oxford Handbook of the New Cultural History of Music** Jane F. Fulcher, 2013-11-01 This volume demonstrates a new approach to cultural history as it now being practiced by both historians and musicologists and the field's quest to grasp the realms of human experience understanding communication and meaning through the study of music and of musical practices The contributors employ a resonant new methodological synthesis which combines the theoretical perspectives drawn from the new cultural history and new musicology of the 1980s with recent social sociological and anthropological theories or those which attempt to ground language and symbols within both social reality and a social field of power
