Sources Of Architectural Form A Critical History Of Western Design Theory:

Sources of Architectural Form Mark Gelernter, 1995 Sources of architectural form is a comprehensive and critical history of Western architectural theory from the ancient world to the present day Mark Gelernter sets out the major design theories in eight chronological periods conveying their flavour with contemporary quotations Each theory is analysed for its strengths and weaknesses Theories of education are also examined as many theorists from Vitruvius to Gropius included precepts for teaching as integral components of their ideas Back cover

Sources of Architectural Form Mark Gelernter, 1995-06-15 Provides a critical history of Western architecture theory from the ancient world to the present day It looks at how the architect generates architectural form in order to explain a number of issues including the origins of style the persistence of tradition and the role of genius The Hybrid Practitioner Caroline Voet, Eireen Schreurs, Helen Thomas, 2022-09-01 Exploring different interrelated roles for the architect and researcher The practice of architecture manifests in myriad forms and engagements Overcoming false divides this volume frames the fertile relationship between the cultural and scholarly production of academia and the process of designing and building in the material world It proposes the concept of the hybrid practitioner who bridges the gap between academia and practice by considering how different aspects of architectural practice theory and history intersect opening up a fascinating array of possibilities for an active engagement with the present The book explores different interrelated roles for practicing architects and researchers from the reproductive activities of teaching consulting and publishing through the reflective activities of drawing and writing to the practice of building The notion of the hybrid practitioner will appeal strongly to students teachers and architectural practitioners as part of a multifaceted professional environment By connecting academic interests with those of the professional realm The Hybrid Practitioner addresses a wider readership embracing landscape design art theory and aesthetics European history and the history and sociology of professions The Venice Variations Sophia Psarra, 2018-04-30 From the myth of Arcadia through to the twenty first century ideas about sustainability how we imagine better urban environments remain persistently relevant and raise recurring questions How do cities evolve as complex spaces nurturing both urban creativity and the fortuitous art of discovery and by which mechanisms do they foster imagination and innovation While past utopias were conceived in terms of an ideal geometry contemporary exemplary models of urban design seek technological solutions of optimal organisation The Venice Variations explores Venice as a prototypical city that may hold unique answers to the ancient narrative of utopia Venice was not the result of a preconceived ideal but the pragmatic outcome of social and economic networks of communication Its urban creativity though came to represent the quintessential combination of place and institutions of its time Through a discussion of Venice and two other works owing their inspiration to this city Italo Calvino's Invisible Cities and Le Corbusier's Venice Hospital Sophia Psarra describes Venice as a system that starts to resemble a highly probabilistic algorithm that is a structure with a small

number of rules capable of producing a large number of variations The rapidly escalating processes of urban development around our big cities share many of the motivations for survival shelter and trade that brought Venice into existence Rather than seeing these places as problems to be solved we need to understand how urban complexity can evolve as happened from its unprepossessing origins in the marshes of the Venetian lagoon to the model city that endured a thousand years This book frees Venice from stereotypical representations revealing its generative capacity to inform potential other Venices for the future

Modernity, Nation and Urban-Architectural Form Shireen Jahn Kassim, Norwina Mohd Nawawi, Mansor Ibrahim, 2018-07-20 This book explores how Malaysia as a multicultural modern nation has approached issues of nationalism and regionalism in terms of physical expression of the built environment Ever since the nation's post Colonial era architects and policy makers have grappled with the theoretical and practical outcomes of creating public architecture that effectively responds to traditions nationhood and modernity The authors compile and analyse prevailing ideas and strategies present case studies in architectural language and form and introduce the reader to tensions arising between a nationalist agenda and local regionalist architectural language These dichotomies represent the very nature of multicultural societies and issues with identity a challenge that various nations across the globe face in a changing environment This topical and pertinent volume will appeal to students and scholars of urban planning architecture and the modern city

Revealing Architectural Design Philip D. Plowright, 2014-01-10 Revealing Architectural Design examines the architectural design process from the point of view of knowledge domains domain syntax coherence framing thinking styles decision making and testing Using straightforward language the book connects general design thinking to underlying frameworks that are used in the architectural design process The book provides historical grounding as well as clear examples of real design outcomes It includes diagrams and explanations to make that content accessible The frameworks and their methods are described by what they can accomplish what biases they introduce and the use of their final outcomes Revealing Architectural Design is an advanced primer useful to anyone interested in increasing the quality of their architectural design proposals through understanding the conceptual tools used to achieve that process While it is intended for undergraduate and graduate students of architectural design it will also be useful for experienced architectural practitioners For the non architect this book opens a window into the priorities of a discipline seldom presented with such transparency

Architectural Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Joana Pestana Lages, Susana Couceiro da Costa, 2019-08-08 The escalating interdependency of nations drives global geopolitics to shift ever more quickly Societies seem unable to control any change that affects their cities whether positively or negatively Challenges are global but solutions need to be implemented locally How can architectural research contribute to the future of our changing society How has it contributed in the past The theme of the 10th EAAE ARCC International Conference Architectural Research Addressing Societal Challenges was set to address these questions

This book Architectural Research Addressing Societal Challenges includes reviewed papers presented in June 2016 at the 10th EAAE ARCC International Conference which was held at the facilities of the Faculty of Architecture of the University of Lisbon The papers have been further divided into the following five sub themes a Changing Society In Transit Global Migration Renaturalization of the City Emerging Fields of Architectural Practice and Research on Architectural Education The EAAE ARCC International Conference held under the aegis of the EAAE and of the ARCC is a conference organized every other year in collaboration with one of the member schools universities of those associations alternatively in North America or in Europe

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedic of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries

Architectural Regeneration Aylin Orbasli, Marcel Vellinga, 2020-07-20 A comprehensive and detailed overview of the active regeneration rehabilitation and revitalisation of architectural heritage The combined processes of globalisation urbanisation environmental change population growth and rapid technological development have resulted in an increasingly complex dynamic and interrelated world in which concerns about the meaning of cultural heritage and identity continue to grow As the need for culturally and environmentally sustainable design grows the challenge for professionals involved in the management of inherited built environments is to respond to this ever changing context in a critical dynamic and creative way Our knowledge and understanding of the principles approaches and methods to sustainably adapt existing buildings and places is rapidly expanding Architectural Regeneration contributes to this knowledge base through a holistic approach that links policy with practice and establishes a theoretical framework within which to understand architectural regeneration It includes extensive case studies of the regeneration rehabilitation and revitalisation of architectural heritage from around the world Different scales and contexts of architectural regeneration are discussed including urban suburban rural and temporary At a time when regeneration policy has shifted to the recognition that heritage matters and that the historic environment and creative industries are a vital driver of regeneration an increasing workload of architectural practices concerns the refurbishment adaptive re use or extension of existing buildings As a result this book is ideal for undergraduate and graduate students of architecture historic conservation urban and environmental design sustainability and urban regeneration as well as for practitioners and decision makers working in those fields

The Rise of Academic Architectural Education Alexander Griffin, 2019-07-02 Academic architectural education started with the inauguration of the Académie d'Architecture on 3 December 1671 in France It was the first

institution to be devoted solely to the study of architecture and its school was the first dedicated to the explicit training of architectural students The Acad mie was abolished in 1793 during the revolutionary turmoil that besieged France at the end of the eighteenth century although the architectural educational tradition that arose from it was resurrected with the formation of the cole des Beaux Arts and prevails in the ideologies and activities of schools of architecture throughout the world today This book traces the previously neglected history of the Acad mie s development and its enduring influence on subsequent architectural schools throughout the following centuries to the present day Providing a valuable context for current discussions in architectural education The Rise of Academic Architectural Education is a useful resource for students and researchers interested in the history and theory of art and architecture

Polish Architecture in Contemporary Innovation Nina Juzwa,Jakub Świerzawski,2023-09-28 Authored by two architects Polish Architecture in Contemporary Innovation Thoughts Dreams and Places tells a story of buildings that were built in Poland between 1980 and 2020 as architecture developed in the Western world and Japan Its main focus is public utility buildings which the authors have touched in situ and which have moved them or sparked their interest The book is divided into three parts Part I focuses on the problem of creating and shaping architectural form and uses examples of both international and Polish architecture In this section the authors pose the question why is the Pritzker Prize so important Part II attempts to answer the question of how architecture can change the image of a place The answer consists of mainly Polish examples of user friendly architecture value and beauty in architecture and place Part III analyses buildings that were created in contemporary Poland Examples are listed in groups according to their function pointing out forms that were inspired by the culture of the region the historical culture of the place or those which are a new quality and are the foundation of the creation of a place This book aims to demonstrate Polish architectural solutions in the context of contemporary trends in the West traditionally seen as more technically and technologically developed countries The floor plans and sections of the buildings presented in the book show the beauty of geometric and formal solutions and give a new and rare perspective on the latest changes in modern Polish architecture This book will be of interest to architects as well as researchers and students of contemporary Polish architecture and culture and its place in the European and international context The Polish edition of this book published in 2021 by the National Institute of Architecture and Urban Planning in Warsaw received the Vitruvius Prize 2022 by the Architecture and Urban Planning Committee of the Polish Academy of Sciences

Changing Trends in Architectural Design Education Jamal Al-Qawasmi,2006

From the Temple to the Castle Lee Morrissey,1999 Visiting Britain in the mid 18th century Andre Rouquet wrote that in England more than in any other country every man would fain be his own architect Not surprisingly then several of the most important 18th century British authors were also practicing architects John Vanbrugh a playwright designed Blenheim Palace the poet Alexander Pope offered

architectural drawings for redesigning the houses of friends and Horace Walpole claimed that the home he renovated Strawberry Hill inspired his Novel *The Castle of Otranto*. The work of John Milton and Thomas Gray also exhibits an abiding interest in architecture. By examining the connections between literature and architecture in the work of these writers and by viewing architecture in literary terms, Lee Morissey traces a narrative of cultural change in the Augustan age and beyond. A literary scholar with a strong background in architectural theory and practice, Morissey examines architectural references made by these authors and architectural publications familiar to them. Each chapter establishes a connection with architecture in the careers of an author and then describes how a principal text, *Paradise Lost*, *The Provoked Wife*, *An Essay on Man*, *Elegy Written in a Country Churchyard*, and *The Castle of Otranto*, focuses the literary and historical issues of the period in architectural terms. While some 20th-century architectural theorists have worried that treating architecture in literary terms robs it of its social function, Morissey argues that architecture can be a language and still participate in political and social contexts because language itself is political and social. The fruit of his argument is a unique intellectual history of late 17th and early 18th-century Britain of use to scholars of architectural history and landscape architecture as well as of literature.

Architectural Theorisations and Phenomena in Asia Francis Chia-Hui Lin, 2017-08-16. This book is the first overall and detailed discussion of contemporary Asia's architectural theorisations and phenomena based on its heteroglossic and decolonisation character. Lin presents a theoretical journey of transdisciplinary reflection upon contemporary Asia's pragmatic phenomena which is methodologically achieved by means of elaborations of how tangible Asian architecture can be philosophically theorised and how interchangeable architectural theory is practically Asianised. Discussions in the book are critically integrated with comparative studies focused on Japan, Taiwan, China, Hong Kong, Singapore, Malaysia, Australia, New Zealand, and the UK. These empirical examinations are highlights of phenomenal localities, architecture, cities, and cultures which reference the historicity of the Asia-Pacific. Asia's contemporary architectural situations and their subtle relationship with the West. The schematisation of intended fuzziness for Asia and its architecture is framed as the notion polychronotypic *jetztzeit* to represent a present time place context of contemporary Asian architecture and urbanism. This book will be of great interest to scholars of Asian Studies, Architectural Studies, Postcolonial Studies, Urban Studies, and Cultural Studies.

Cosmopolitanism in Mexican Visual Culture María Fernández, 2014-01-06. Since the colonial era, Mexican art has emerged from an ongoing process of negotiation between the local and the global which frequently involves invention, synthesis, and transformation of diverse discursive and artistic traditions. In this pathfinding book, María Fernández uses the concept of cosmopolitanism to explore this important aspect of Mexican art in which visual culture and power relations unite the local and the global, the national and the international, the universal and the particular. She argues that in Mexico, as in other colonized regions, colonization constructed power dynamics and forms of violence that persisted in the independent nation state. Accordingly, Fernández presents not only the visual qualities of objects but also the discourses, ideas, desires, and

practices that are fundamental to the very existence of visual objects Fernandez organizes episodes in the history of Mexican art and architecture ranging from the seventeenth century to the end of the twentieth century around the consistent but unacknowledged historical theme of cosmopolitanism allowing readers to discern relationships among various historical periods and works that are new and yet simultaneously dependent on their predecessors She uses case studies of art and architecture produced in response to government commissions to demonstrate that established visual forms and meanings in Mexican art reflect and inform desires expectations memories and ways of being in the world in short that visual culture and cosmopolitanism are fundamental to processes of subjectification and identity

Grammatical and Syntactical Approaches in Architecture: Emerging Research and Opportunities Lee, Ju Hyun, Ostwald, Michael J., 2019-12-20 Shape grammar and space syntax have been separately developed but rarely combined in any significant way The first of these is typically used to investigate or generate the formal or geometric properties of architecture while the second is used to analyze the spatial topological or social properties of architecture Despite the reciprocal relationship between form and space in architecture it is difficult to conceptualize a completed building without a sense of both of these properties the two major computational theories have been largely developed and applied in isolation from each another Grammatical and Syntactical Approaches in Architecture Emerging Research and Opportunities is a critical scholarly resource that explores the relationship between shape grammar and space syntax for urban planning and architecture and enables the creative discovery of both the formal and spatial features of an architectural style or type This book furthermore presents a new method to selectively capture aspects of both the grammar and syntax of architecture Featuring a range of topics such as mathematical analysis spatial configuration and domestic architecture this book is essential for architects policymakers urban planners researchers academicians and students
