Sourcing Practices In The Apparel Industry Implications For Garment Exporters In Commonwealth Developing Countries:

Sourcing Practices in the Apparel Industry Marlon Lezama, Brian Webber, Charles Dagher, 2004 Sourcing practices in the global apparel industry are changing because of the removal of quotas new trade agreements and a drive by apparel importers to lower costs This study addresses the implications of these changes for garment manufacturers in Commonwealth developing countries The principal research activities behind the book consisted of face to face interviews in North America with top sourcing executives of apparel importing companies and senior executives of apparel manufacturing companies and other stakeholders in six Commonwealth developing countries The findings indicate that almost without exception apparel manufacturers are struggling to lower costs and to increase productivity so as to remain competitive Government and industry are thus faced with critical decisions on how best to support the apparel industry in their respective countries The principal outputs of the study are enterprise level guidelines to remain competitive in the face of evolving sourcing policies technology and practices complemented by related frameworks at government and institutional levels

Fashion Logistics John Fernie, David B. Grant, 2019-11-03 Retailers are being advised to review their supply chains in a bid to accelerate their speed to market Fashion Logistics assesses the growth and changes in the industry as well as the drivers of change in the market Supply chain networks and operations play an integral role in distributing product across the retail industry and significant changes within those networks have altered the way in which they function Manufacturers therefore need to rethink their supply chains to make them resilient to shock agile enough to respond quickly to sudden change flexible enough to customize products and efficient enough to protect margins Fashion Logistics assesses these forces and changes and how manufacturers should adapt their working practices accordingly This second edition of Fashion Logistics includes revised CSR and reshoring sections updated case studies and new content on how manufacturers can adapt their working practices and the further demise of the department store sector

Sustainability in Fashion and Textiles Miguel Angel Gardetti, Ana Laura Torres, 2017-09-08 There is no doubt that the textile industry the production of clothing fabrics thread fibre and related products plays a significant part in the global economy It also frequently operates with disregard to its environmental and social impacts The textile industry uses large quantities of water and outputs large quantities of waste As for social aspects many unskilled jobs have disappeared in regions that rely heavily on these industries Another serious and still unresolved problem is the flexibility textile industry companies claim to need Faced with fierce international competition they are increasingly unable to offer job security This is without even considering the informal sector work proliferating both in developing and developed countries Child labour persists within this sector despite growing pressure to halt it Fashion demands continuous consumption In seeking to own the latest trends consumers quickly come to regard their existing garments as inferior if not useless Old items become unwanted as quickly as new ones come into

demand This tendency towards disposability results in the increased use of resources and thus the accelerated accumulation of waste It is obvious to many that current fashion industry practices are in direct competition with sustainability objectives yet this is frequently overlooked as a pressing concern It is however becoming apparent that there are social and ecological consequences to the current operation of the fashion industry sustainability in the sector has been gaining attention in recent years from those who believe that it should be held accountable for the pressure it places on the individual as well as its contribution to increases in consumption and waste disposal This book takes a wide screen approach to the topic covering among other issues sustainability and business management in textile and fashion companies value chain management use of materials sustainable production processes fashion needs and consumption disposal and innovation and design The book will be essential reading for researchers and practitioners in the global fashion business Logistics and Retail Management

John Fernie, Leigh Sparks, 2014-04-03 The 21st century has witnessed important changes in retail logistics Supply chain managers are presented with key challenges as retailers have recognised the strategic role that supply chains play in cost reduction and customer service The 4th edition of Logistics and Retail Management has been substantially updated to take account of these recent developments in retail logistics Logistics and Retail Management provides the most up to date thinking in retail supply chain management reflecting the changing needs of the global marketplace and the challenges faced by retailers in the 21st century With contributions from acclaimed academics and practitioners it covers global logistics fashion logistics e logistics and green supply chains The 4th edition features brand new chapters on supply chain management in international fashion and corporate social responsibility in the textile supply chain **Towards Better Work**
