Century The book informed much of the scholarly work on democratisation in Africa Although comprehensive in classifying the causes and limitations of transitions to democracy The Third Wave was also limited in its definition of democracy and expectations of a new democracy This volume engages with the topics of democracy and democratisation in contemporary African politics at the local national and continental level It acknowledges a conceptual debt to Huntington when discussing elections party systems leadership and the development of continental norms of liberal democracy but also highlights new conversations eg about participatory spaces that go beyond the Third Wave

The Political Economy of Modern South Africa Alf Stadler, 2022-10-05 Originally published in 1987 this book argues that South African politics reflect the changing ways in which the region has been incorporated into the world economy It traces the effects of a process of industrialisation under the dominance of mining on the other sectors of the economy and on the evolution of the class structure It shows how a coercive labour system influenced the definition of political and social rights in racial terms and profoundly influenced the development of authoritarian controls over blacks in the urban and rural areas from the 1920s onwards The book includes an essay on the different strands in the reform movement and speculates about the social and political forces which underlined the political changes which began to take place during the mid 1970s

Political Science in South Africa Peter Vale, Pieter Fourie, 2016-01-13 In 2013 and in 2014 respectively the South African Association of Political Studies SAAPS and Politikon the South African Journal of Political Studies celebrate their 40th anniversary Also in April 2014 South Africa celebrates twenty years since the advent of the post Apartheid democracy and the birth of the rainbow nation This book provides a timely account of the birth and evolution of South African politics over the past four decades but also of the study of Political Science and International Relations in this

country Fourteen political scientists contribute chapters to this volume situating the study of politics within its global context and recounting the development of politics as a field of study at South African universities The fourteen contributions evaluate the state of the discipline s and suggest conclusions that are surprising and in many instances unsettling not only with regards to what and how politics is taught but also how its study has variously gained and lost pertinence for South Africans understanding of their own polity as well as its place in the world The implications are uncomfortable and pose interesting challenges for South African scholarship pedagogy and national self reflection This book was published as a special issue of *Politikon* Rethinking African Politics Miles Larmer,2016-04-08 In 1964 Kenneth Kaunda and his United National Independence Party UNIP government established the nation of Zambia in the former British colony of Northern Rhodesia In parallel with many other newly independent countries in Africa this process of decolonisation created a wave of optimism regarding humanity s capacity to overcome oppression and poverty Yet as this study shows in Zambia as in many other countries the legacy of colonialism created obstacles that proved difficult to overcome Within a short space of time democratisation and development was replaced by economic stagnation political authoritarianism corruption and ethnic and political conflict To better understand this process Dr Larmer explores UNIP s political ideology and the strategies it employed to retain a grip on government He shows that despite the party s claim that it adhered to an authentically African model of consensual and communitarian decision making it was never a truly nationally representative body Whereas in long established Western societies unevenness in support was accepted as a legitimate basis for party political difference in Zambia this was regarded as a threat to the fragile bindings of the young nation state and as such had to be denied and repressed This led to the declaration of a one party state presented as the logical expression of UNIP supremacy but it was in fact a reflection of its weakening grip on power Through case studies of opposition political and social movements rooted in these differences the book demonstrates that UNIP s control of the new nation state was partial uneven and consistently prone to challenge Alongside this the study also re examines Zambia s role in the regional liberation struggles providing valuable new evidence of the country s complex relations with Apartheid era South Africa and the relationship between internal and external opposition shaped by the context of regional liberation movements and the Cold War Drawing on extensive archival research and interviews Dr Larmer offers a ground breaking analysis of post colonial political history which helps explain the challenges facing contemporary African polities Women's Representation in African Politics Zainab Monisola Olaitan,2024-12-11 Does the election of more and more women into political offices mean that women s interests will be better protected This question forms the background upon which this book is written as it forms a timely intervention concerning the clamour for increased women s representation in African politics The book examines the relationship between gender quotas and gender focused legislative policy outcomes in the national Parliaments of South Africa and Botswana By investigating the utility of gender quotas to ensure the substantive representation of women in

African politics the book engages the assumption that increased women's political participation will automatically improve the qualitative well being of African women The book is intended for both academic and non academic audiences with differing purposes It contributes to scholarly debates on the transcending relevance of quotas beyond numbers For non academics it provides opportunities to engage gender quotas as a policy tool to ensure the qualitative well being of African women
