Yates, 1972 *The South Downs* Peter Brandon, 2022-03-31 The South Downs has throughout history been a focus of English popular culture With chalkland their river valleys and scarp foot the Downs have been shaped for over millennia by successive generations of farmers ranging from Europe s oldest inhabitants right up until the 21st century possibly the most important book to have been written on the South Downs in the last half century The South Downs have found their perfect biographer Downs Country

The Rother Valley John Boardman, Ian Foster, 2024-12-31 The valley of the western Rother lies within the South Downs National Park but has a special character based on its Cretaceous geology of sandstones and clays These give rise to soils that are ideal for agriculture but are extremely erodible Over the centuries the area has been exploited by humans and partially cleared of forest In this book the archaeological history of the Rother Valley is summarized with particular emphasis on the evidence for Mesolithic Bronze Age and Roman occupation Analysis of sediments in ponds adds to the evidence for changes that have happened over the last few hundred years A notable feature of the cultural landscape is the network of sunken lanes The Rother Valley contains unique chalk aquifer fed streams with rare and protected species such as sea trout and otter Heathland floodplain wet meadows and woodlands are interspersed with agriculture linked together by hedgerows and ditches The health of the river is threatened by polluting inputs from farming and sewage Past weather and hydrological records show the potential impact of climate change on the functioning of the river The impact of recent changes on water availability for irrigation and human consumption are explored in relation to ecosystem requirements Soil erosion is a significant problem with the resulting high river sediment concentrations requiring expensive cleaning for the water to be fit for human consumption and the runoff often causes flooding of roads and properties Mitigation measures aim to reduce the loss of soil on fields and interrupt connectivity between fields and the river system We identify sediment sources contributing eroded soil to the river the function of field edge sediment traps in stream weirs and major reservoirs on sediment storage and connectivity Finally the book considers the future of the unique landscape that is the Rother Valley including plans for restoration of the flood plain Contributors include planners researchers and managers of the large estates that are an integral part of the Rother landscape *Sussex Archaeological Collections Relating to the History and Antiquities of the County* Sussex Archaeological Society, 1985 Local History in West Sussex Kim C.
