Southern Railway Gallery John Scott-Morgan, 2017-11-30 Southern Railway Gallery is the first volume in a new series of picture books designed to be of interest to railway historians and modellers The series subjects are themed to include an interesting mixture of useful historic illustrations depicting locomotives rolling stock and infrastructure Southern Railway Gallery covers the history of the Southern Railway from its beginnings in 1923 to nationalisation in 1948 covering most aspects of its fascinating history and operations The book looks at aspects of the Southern from the early years in the early 1920s when the company had old worn out stock on many of its lines through to the introduction of new modern rolling stock and the electrification of much of its network in Kent Sussex Surrey and parts of Hampshire The company operated an extensive rail and bus network on the Isle of Wight which covered the whole island and is well remembered to this day Although the Southern introduced a number of modern new steam classes its main goal was to electrify as much of the network as possible however this did not preclude the company from introducing two classes of successful Pacific type locomotives in the 1940s The company owned and operated docks and harbours throughout its existence having an extensive fleet of ferries and cargo vessels some of which served with the Royal Navy in the Second World War as hospital ships The Southern also operated bus and road services which covered many areas not served by a local railway station on the system The Southern Railway ceased to exist at midnight on 31 December 1947 after a remarkable existence of twenty four years **Southern National Omnibus**

Company Colin Morris, 2021-01-15 An expert account of Southern National's operations and vehicles richly illustrated with many colour photographs **Lloyd's Register of British and Foreign Shipping**, 1906 *Seventy Years of Railway Photography* Colin Boocock, 2018-03-30 Colin Boococks railway photographs are already familiar as they have been featured

in a variety of railway books and magazines This book shows around 300 of his favorite images that illustrate the many different aspects of railway photography The key seven chapters in this book each cover one decade from the 1940s up to the present day Not only do they display the early improvement in his photography as he gained experience they also bring into focus how much railways have changed over the last seventy years Grimy steam locomotives in smoky surroundings persisted in ever reducing pockets as more modern forms of traction spread across our railways Working steam finally disappeared from UK main lines in 1968 and around coal mines in the mid 1980s The later chapters benefit greatly from Colins worldwide travels in which he searched for more unfamiliar railways The growth of heritage railways also features Useful appendices add insights into Colins experience of camera technologies and photographic techniques These emphasize the changes that have faced him as his photography has moved from black and white to color and from films and darkrooms to the computer and the digital age Colin last used film in early 2004 having embraced digital photography with enthusiasm **The Railway Magazine**, 1923

The Southern Railway may not have been the most glamorous of the Big Four companies that emerged from the grouping of

1923 but it was the great innovator In the 1930s the Southern pioneered the first main line electrification and created the largest electrified suburban railway network in the world It was also one of the few to offer regular departures and the first to run true international services introducing the Night Ferry through trains from London to Paris using special ferries Forming part of a series along with The GWR Handbook The LMS Handbook and The LNER Handbook this new edition provides an authoritative and highly detailed reference of information about the Southern Railway Dorset, New Forest & Isle of Wight Footprint Focus Guide Jane Anderson,2013-06-28 Dorset and the surrounding area is filled with natural wonders and all the attractions of the seaside From the quirky charm of the Isle of Wight to the rolling farmland of Dorset this part of the UK provides English rural charm at its best Footprint Focus provides invaluable information on transport accommodation eating and entertainment to ensure that your trip includes the best of this quaint region of the UK Essentials section with useful advice on getting to and around Dorset New Forest Isle of Wight Comprehensive up to date listings of where to eat sleep and seek adventure Includes information on tour operators and activities from spotting wild ponies in the New Forest to visiting the stunning beaches of Poole Detailed maps for Dorset New Forest Isle of Wight and the main cities in the region Slim enough to fit in your pocket With detailed information on all the main sights plus many lesser known attractions Footprint Focus Dorset New Forest Isle of Wight includes Stonehenge Salisbury Winchester provides concise and comprehensive coverage of one of England s prettiest regions Alfred Raworth's Electric Southern Railway Peter Steer,2022-05-05 The Southern Railway between 1923 and 1939 was the only British company to carry out a sustained programme of electrification which became known as the Southern Electric Unlike many recent projects each incremental step was completed on time and within budget This successful project was more impressive as it was achieved during a period of economic stagnation including the great depression and despite government disapproval of the method of electrification The driving force behind this endeavor was the railway s general manager Sir Herbert Walker but at his side was his electrical engineer Alfred Raworth the man one journalist described as an electrification genius Alfred Raworth s career began working with his father the eminent consulting engineer and entrepreneur John Smith Raworth Following the collapse of his father s business Alfred joined the railway industry and devised an ambitious and innovative electrification design This was discarded when the railways of southern England were grouped into the Southern Railway after which he took responsibility for the implementation of the electrification schemes With Walker s retirement in 1937 those who continued to support steam traction took the policy lead A marginalised Raworth retired but was later to witness the fruition of many of his discarded ideas Report Commonwealth Shipping Committee,1911 A Pictorial and Descriptive Guide to North Wales (southern Section) ...
