*Critical Perspectives on Human Security* David Chandler, Nik Hynek, 2010-09-13 This new book presents critical approaches towards Human Security which has become one of the key areas for policy and academic debate within Security Studies and IR The Human Security paradigm has had considerable significance for academics policy makers and practitioners Under the rubric of Human Security security policy practices seem to have transformed their goals and approaches re prioritising economic and social welfare issues that were marginal to the state based geo political rivalries of the Cold War era Human Security has reflected and reinforced the reconceptualisation of international security both broadening and deepening it and in so doing it has helped extend and shape the space within which security concerns inform international policy practices However in its wider use Human Security has become an amorphous and unclear political concept seen by some as progressive and radical and by others as tainted by association with the imposition of neo liberal practices and values on non Western spaces or as legitimizing

attacks on Iraq and Afghanistan This book is concerned with critical perspectives towards Human Security highlighting some of the tensions which can emerge between critical perspectives which discursively radicalise Human Security within frameworks of emancipatory possibility and those which attempt to deconstruct Human Security within the framework of an externally imposed attempt to regulate and order the globe on behalf of hegemonic power The chapters gathered in this edited collection represent a range of critical approaches which bring together alternative understandings of human security This book will be of great interest to students of human security studies and critical security studies war and conflict studies and international relations

**International Relations and States of Exception** Shampa Biswas, Sheila Nair, 2009-12-16 Critically but sympathetically interrogating Italian philosopher Giorgio Agamben's analysis of the logic of sovereign power this volume draws attention to the multiple zones of exclusion in and through which contemporary international politics constitutes itself Beginning from the margins and peripheries of world politics this book emphasises the colonial processes through which contemporary third world spaces of exception have been shaped and particular bodies made susceptible to the conditions of bare life The authors contend that these bodies inhabit a variety of spaces or zones of indistinction that include political detainees refugees asylum seekers poor migrants sweatshop workers and unassimilated indigenous populations These are the expendable bodies that the territorial and market driven logic of current international relations simultaneously produces polices and excludes Focussing on the locally and socio historically specific ways that sovereign power works the individual chapters provide the volume with a wide geographical reach Drawing on diverse approaches this text constitutes an important intervention in critical international relations providing grounded theory and sophisticated analyses of how contemporary international relations works through the production of exceptions Bringing together a range of internationally renowned scholars **International Relations and States of Exception** will be of vital interest to students and scholars of International Relations Critical Theory and Postcolonial Studies

Memory, Trauma and World Politics D. Bell, 2006-10-20 **Memory Trauma and World Politics** focuses on the effect that the memory of traumatic episodes especially war and genocide has on shaping contemporary political identities Theoretically sophisticated and empirically rich this book is an incisive

treatment of the ways in which the study of social memory can inform global politics analysis      Universality, Ethics and International Relations Véronique Pin-Fat, 2009-10-16 Universality Ethics and International Relations introduces students to the key debates about ethics in international relations theory This book explores the reasons why grappling with universality and ethics seems to be a profound endeavour and where we end up when we do By offering a new way of thinking about ethics in International Relations Pin Fat shows that there are several varieties of universality which are offered as the answer to ethics in global politics the divine universality of Hans Morgenthau the ideal universality of Charles R Beitz and the binary universality of Michael Walzer Taking the reader on a grammatical odyssey through each the book concludes that profound searches for the foundations of universality can't fulfil our deepest desires for an answer to ethics in global politics Pin Fat suggests that the failure of these searches reveals the ethical desirability of defending universality as impossible An ideal text for use in a wide variety of courses including ethics in international relations international relations theory and international political theory this work provides a valuable new contribution to this rapidly developing field of research

**Risk and the War on Terror** Louise Amoore, Marieke de Goede, 2008-06-11 Pt 1 Risk precaution governance pt 2 Crime deviance exception pt 3 Biopolitics biometrics borders pt 4 Risks tactics resistances      **Posthuman Dialogues in International Relations** Erika Cudworth, Stephen Hobden, Emilian Kavalski, 2017-08-10 Posthumanism represents a significant new research direction both for International Relations and the social sciences It emerges from questions about inter species relations which challenge dominant perceptions of what it means to be human Rather than seeing the human species as in nature posthumanist thinking considers the species as of nature The work of posthumanist thinkers has sought to dispute accepted notions of what it means to be human raising profound questions about our relations with the rest of nature The volume commences with an overview of the influence thinkers have had on the development of posthumanist thinking Key ideas in International Relations are interrogated and reconceptualised and specific case studies are presented with a focus on inter species relations The work allows for a consideration of the limits of the posthumanist move and provides space for critics to argue that such an approach opens the discipline up to a biological determinism and that a focus on inter human relations should mark the boundaries of the discipline The essays collected in this volume provide an overview of contributions from posthumanist thinkers with the particular intention of providing a succinct introduction to the area and should appeal to scholars and students in Politics IR and philosophy      The Logics of Biopower and the War on Terror C. Masters, E. Dauphinee, 2016-09-23 The contributors explore the intellectual cultural and political logics of the US led war on terror and its consequences on lived lives in a range of contexts The book interrogates the ways in which biopolitical practices hinge on political imaginaries and materialities of violence and death
