Soviet Defense Decisionmaking What Do We Know And What Do We Understand:

Soviet Defense Decisionmaking Stephen M. Meyer, 1982-01-01 **Soviet Ballistic Missile Defense and the Western Alliance** David Scott Yost, 1988 Yost suggests that the challenges for Western policy posed by Soviet ballistic missile defense BMD programs stem partly from Soviet military programs Soviet arms control policies and Soviet public diplomacy campaigns and partly from the West's own intra alliance disagreements and lack of consensus about Western security requirements *Economics And Politics In The USSR* Hans-Hermann Hohmann, 2019-03-05 Soviet scholars have apparently stayed clear of meaningful analysis of such touchy subjects as interdependence and conflict in the relationship between economics and politics Very little has been published on this issue no surprise in a system that controls centrally both politics and the economy with an emphasis on rapid economic development The absence of meaningful Soviet research led the Federal Institute for East European and International Studies in Cologne to sponsor an international interdisciplinary conference on the subject Contributions to the resulting book cover three main areas The first includes the impact of traditional Russian political culture on contemporary Soviet economic thinking and behavior the rank of economic aims in the priority system of Soviet politics and the function of economic institutions in the implementation of political aims The second concerns the role of political lobbies in the economy and repercussions of economic change for Soviet politics Foreign economic relations and the USSR's foreign policy make up the third area The concluding discussion reviews the state of international research and identifies areas for future study *Russian Negotiating Strategy* Paul R. Bennett, 1997 Russian Negotiating Strategy Analytic Case Studies From Salt Start **Technology and Strategic Forces** Brent Scowcroft, 1986

Soviet Imperatives for the 1990's United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on European Affairs, 1986 **Russian Strategic Modernization** Nikolai Sokov, 2000-01-19 This invaluable study provides a unique insider's view of the history of Soviet and Russian policy on nuclear weapons modernization and charts the future evolution of the Russian strategic arsenal Using information that has only recently become available and introducing new previously unknown data Sokov concludes that the most important force behind the evolution of the Soviet and Russian strategic arsenal was the military itself which sought to increase strategic stability by enhancing the survivability of weapons systems The highly destabilizing posture of the 1970s and 1980s was he argues in a sense accidental resulting from the failure of several R D programs and specific features of the Soviet decisionmaking mechanism The author demonstrates that the role of such factors as the economic crisis U S modernization programs and general Russian foreign policy goals has been exaggerated by Western analysts No matter how hard pressed Russia will hold to its current plans Sokov argues At the same time the military will be unlikely to engage in a new arms buildup even if the economic situation improves or a nationalist government comes to power Instead stability will be sought through better quality of weapons at progressively lower levels Introducing a wealth of new information on Soviet and Russian national security policymaking the author explores in

meticulous detail such key issues as decisions on weapons development arms control negotiations and the handling of the Soviet nuclear arsenal after the breakup of the Soviet Union The reader will be able to follow the debates and intrigues between military planners diplomats and weapons designers as they clashed over the choice of acquisition programs and negotiating positions With its combination of informed analysis and use of new documentation this work will be invaluable for all concerned with U S Russian strategic relations

Innovation and the Arms Race Matthew Evangelista,2023-08-15 Innovation and the Arms Race investigates the causes and mechanisms of the technological arms race between the United States and the Soviet Union Challenging the commonly held notion that Soviet weapons innovation processes simply mirror those of the United States Matthew Evangelista shows that the United States usually leads in introducing new military technology while the Soviets typically react to American initiatives Evangelista bases his study of pivotal nuclear weapons development decisions on a variety of US and USSR primary sources including the memoirs of weapons designers and scientists declassified intelligence analyses Soviet Academy of Science documents and Nikita Khrushchev's taped reminiscences He finds that in the United States impetus for innovation comes from the bottom at the initiative of corporate or government researchers and military officials whereas the centralized Soviet system produces innovations from the top in response to foreign developments A revelatory analysis of US military policy Soviet American relations and weaponry development Innovation and the Arms Race bears lessons for the study of great power competition and military innovation today

Black Box Alexander Dallin,2023-11-10 On September 1 1983 a Soviet fighter plane shot down a South Korean commercial airliner KAL 007 killing all 269 persons aboard Why did the jet stray hundreds of miles off course and fly for hours over Soviet territory including sensitive nuclear and submarine installations And why did the Soviets decide that that plane had to be brought down These are the major questions this book addresses It is the first book length exploration of all the available information and it weighs each of the hypotheses that has been advanced here and abroad to explain the dramatic episode which led to a Soviet American confrontation just as relations between the two super powers seemed to be on the verge of improvement This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985

Engaging the Enemy Kimberly Marten Zisk,1993-05-17 Did a doctrine race exist alongside the much publicized arms competition between East and West Using recent insights from organization theory Kimberly Marten Zisk answers this question in the affirmative Zisk challenges the standard portrayal of Soviet military officers as bureaucratic actors wedded to the status quo she maintains that when they were confronted by a changing external security environment they reacted by producing innovative doctrine

The author's extensive evidence is drawn from newly declassified Soviet military journals and from her interviews with retired high ranking Soviet General Staff officers and highly placed Soviet Russian civilian defense experts. According to Zisk, the Cold War in Europe was powerfully influenced by the reactions of Soviet military officers and civilian defense experts to modifications in U.S. and NATO military doctrine. Zisk also asserts that contrary to the expectations of many analysts, civilian intervention in military policy making need not provoke pitched civil military conflict. Under Gorbachev's leadership, for instance, great efforts were made to ensure that defensive defense policies reflected military officers' input and expertise. *Engaging the Enemy* makes an important contribution not only to the theory of military organizations and the history of Soviet military policy but also to current policy debates on East-West security issues. Kimberly Marten Zisk is Assistant Professor of Political Science and Faculty Associate of the Mershon Center at the Ohio State University. Verification Allan S. Krass, Stockholm International Peace Research Institute, 2020-11-19. Originally published in 1985, the level of anxiety and suspicion between the USA and the USSR had rarely been higher. Many advocates of arms control believed that effective verification would reduce tensions and lessen the risk of war. This book analyses the two main issues of verification. One is technological: what are the present capabilities of various verification techniques and what is their potential? The devices and methods currently employed by the two major nuclear powers and by international organizations to monitor the compliance of states with arms control or disarmament treaties are examined. The second issue is political: how do US and Soviet approaches compare? What are the roles of domestic and bureaucratic politics and on what criteria can a workable standard of adequacy be based? In short, how much is enough? Although the study concludes that a number of significant arms control measures can already be adequately verified, modern weapons are becoming more mobile and it is becoming easier to conceal them. There is a danger that the ability to hide weapons will outstrip the ability to find them. Verification cannot promise to detect all violations; a workable standard of adequacy in verification must derive from the ability to detect militarily significant violations. *Creating a Database on International Nuclear Commerce* William C. Potter, 1987.

Perceived Images Daniel Frei, 1986. Current thinking on arms control and disarmament has been dominated by the analysis of such objective factors as the number of weapons, their characteristics, technological developments and nuclear weapons deployment policies. Yet arms control negotiations have had little success so far. In this volume, Daniel Frei asserts that while such objective analysis is indeed indispensable, it needs to be supplemented by a careful, document-based description of Soviet and U.S. perceptions of one another and of the kind of assumptions that have thus far compelled their leaders to seek security in growing numbers of sophisticated weapons at ever increasing cost. **The Soviet Union and Arms Control** Paul R. Bennett, 1989-12-11. In an age of nuclear arms diplomacy, Westerners still lack a deep understanding of how the Russians negotiate. Much has been written about Soviet negotiating tactics, especially in light of the recent INF Treaty, but there has been no systematic way of analyzing the Soviet record. *The Soviet Union and Arms Control* provides a

coherent penetrating model for understanding Soviet negotiating tactics strategies and modes based not merely on impressions but on carefully analyzed case studies Through this analysis Westerners can begin to understand the different types of Soviet negotiating behavior and the factors that influence Soviet decision making This book systematically sorts and organizes the existing literature on Soviet tactics supplemented by interviews with former U S negotiators into a coherent theory The book s first two chapters examine Soviet negotiating modes strategies and tactics and two different models of the Soviet process of decision making The final two chapters explore two case studies The Brezhnev Era SALT II 1972 1974 and The Gorbachev Era Nuclear and Space Talks 1985 1988 that provide a practical test of the theories These two case studies trace Soviet diplomacy stage by stage and issue by issue demonstrating that internal politics in the Soviet Union has a lesser effect on negotiations than considerations of the Soviet national interest Problems of Communism ,1984

Understanding the Impact of Emotional Stress on Crisis Decision Making Noel Allan Sawatzky,2022-01-03 Motivational models are critical to understanding crisis decision making because leaders and their advisors are emotionally involved intent on reducing stress and motivated to find ways of advancing their interests while minimizing the risk of war The principal theoretical work on the subject is Irving Janis and Leon Mann s classic study of decision making published in 1977 While useful the book has a significant flaw Janis and Mann theorize that policy maker stress during crisis is derived from decision deliberation leading to a circular approach This book solves the identified problem by addressing circularity between the rise of psychological stress decision deliberation and dysfunctional behavior with an independent measure of decision conditions using cognitive complexity With an effective independent measure of stress the key contribution of this volume is a reformulation of Janis and Mann s model to render the construct more rigorous and empirically useful to the present day study of crisis decision making *Soviet Nuclear Strategy from Stalin to Gorbachev* Honoré Marc Catudal,1989
