Swimmers Among The Trees:

Afloat in the Forest: or, A Voyage among the Tree-Tops Томас Майн Рид, 2017-03-28 *Afloat in the Forest, Or, A Voyage Among the Tree-tops* Mayne Reid, 1867 **Phoenix and the Birds of Prey** Mark Moyer, 2022-01-18 This study explodes prevailing myths about the Phoenix Program the CIA's top secret effort to destroy the Viet Cong by neutralizing its civilian leaders Drawing on recently declassified documents and interviews with American South Vietnamese and North Vietnamese sources Mark Moyer examines the attempts to eradicate the Viet Cong infrastructure and analyzes their effectiveness He addresses misconceptions about these efforts and provides an accurate complete picture of the allies decapitation of the Viet Cong shadow government Combining social and political history with a study of military operations Moyer offers a fresh interpretation of the crucial role the shadow government played in the Viet Cong's ascent Detailed accounts of intelligence operations provide an insider's view of their development and reveal what really happened in the safe havens of the Viet Cong Filled with new information Moyer's study sets the record straight about one of the last secrets of the Vietnam War and offers poignant lessons for dealing with future Third World insurgencies This Bison Books edition includes a new preface and chapter by the author **The 100 Greatest Swimmers in History** John Lohn, 2018-08-24 In *The 100 Greatest Swimmers in History* John Lohn profiles some of the biggest names the sport has ever seen from Mark Spitz and Tracy Caulkins to Katie Ledecky and Michael Phelps Each swimmer is ranked based on achievements such as Olympic medals world and European championships and world records Lohn provides insight into how these swimmers became the best in their sport by detailing their accomplishments finest performances records and noteworthy biographical information This new updated edition contains results from the two most recent World Championships and the 2016 Olympic Games and while many athletes further cemented their top 100 status some newcomers also made their way into the rankings including Katie Ledecky who launched herself high up the list with her dominating performances *The 100 Greatest Swimmers in History* also features a new section highlighting the top coaches in the sport and includes multiple appendixes that serve as wonderful references for information such as world and Olympic medal counts of the profiled swimmers Fans coaches athletes and sport historians alike will find this an indispensable resource **The Boy's Own Annual**, 1906 **Focus on Indonesia**, 1967 **The Runes of Evolution** Simon Conway Morris, 2015-06-30 How did human beings acquire imaginations that can conjure up untrue possibilities How did the Universe become self aware In *The Runes of Evolution* Simon Conway Morris revitalizes the study of evolution from the perspective of convergence providing us with compelling new evidence to support the mounting scientific view that the history of life is far more predictable than once thought A leading evolutionary biologist at the University of Cambridge Conway Morris came into international prominence for his work on the Cambrian explosion especially fossils of the Burgess Shale and evolutionary convergence which is the process whereby organisms not closely related not monophyletic independently evolve similar traits as a result of having to adapt to

similar environments or ecological niches In *The Runes of Evolution* he illustrates how the ubiquity of convergence hints at an underlying framework whereby many outcomes not least brains and intelligence are virtually guaranteed on any Earth like planet Conway Morris also emphasizes how much of the complexity of advanced biological systems is inherent in microbial forms By casting a wider net *The Runes of Evolution* explores many neglected evolutionary questions Some are remarkably general Why for example are convergences such as parasitism carnivory and nitrogen fixation in plants concentrated in particular taxonomic hot spots Why do certain groups have a particular propensity to evolve toward particular states Some questions lead to unexpected evolutionary insights If bees sleep as they do do they dream Why is that insect copulating with an orchid Why have sponges evolved a system of fiber optics What do mantis shrimps and submarines have in common If dinosaurs had not gone extinct what would have happened next Will a saber toothed cat ever re evolve Cona Morris observes Even amongst the mammals let alone the entire tree of life humans represent one minute twig of a vast and largely fossilized arborescence Every living species is a linear descendant of an immense string of now vanished ancestors but evolution itself is the very reverse of linear Rather it is endlessly exploratory probing the vast spaces of biological hyperspace Indeed this book is a celebration of how our world is and was populated by a riot of forms a coruscating tapestry of life *The Runes of Evolution* is the most definitive synthesis of evolutionary convergence to be published to date
