Engineering of Music for the Digital Age Jeffrey Ewing, Steven Simske, 2024-10-23 Musical scores like literature poetry and technical manuals are documents The central tenet of this book is that musical composition in the digital age is a form of document engineering In essence music shares with other forms of creative content generation from poetry to prose and from science to science fiction the need for structure flow and sources for creativity Musical composition is considered in this book as the creative process of engineering musical documents with regards to its arrangement form texture and instrumentation etc This document then instructs a performance or the creation of an alternative document such as a recording In this book the arrangement of phrases patterns and structures seen in music will be illustrated to give new composers a starting point to begin planning and making decisions about their own compositions The book will also guide those who need assistance in completing a piece While this is a book about musical composition it is not meant to be a manual on music theory Instead the book keeps its focus on the structural elements of a composition Its aim is to give the audience a structural road map for composing whether they are starting a piece from the first note having a melody in mind already or need help overcoming a creative hurdle The book examines compositions that clearly define a form or technique Among the key compositional elements are Form Phrase Period and Expression in Composition Rhythm Motive Melody and Harmony Tonal Center Mode Mixture and Modulation Accompaniment Instrumentation Orchestration Composition Techniques and Notation Targeted examples cover all stages of writing a piece helping to build the reader's composition from the first note into a complete work without promoting a style or harmonic practice Each chapter contains a sidebar addressing helping the composer to add creative sources for the music making process Finally the book concludes with a chapter on creativity in terms of how composed music can affect our lives and even our fairy tales **Madam Butterfly** Giacomo Puccini, 1906 **Re-Reading the Beethoven Violin Sonatas** Daniel Tong, 2025-04-08 New readings of the ten Beethoven sonatas for piano and violin embracing both the performer's interpretation and the analyst's rigour This book provides new readings of the ten Beethoven sonatas for piano and violin many of which have been given surprisingly little attention by scholars to date This may be because nine of the sonatas are relatively early works written between 1797-1803 with only the final sonata Op 96 1812 standing apart However within these ten works Beethoven demonstrates numerous aspects of his musical personality and compositional style The analyses in this book engage with postmodern concerns such as hermeneutics intertextuality gender humour narratology and human interest revealing characteristics within these sonatas that have been slow to come to light Here are examples of the Beethovenian narrative that do not always encapsulate heroic struggle and triumph in many of the sonatas we find a witty smiling composer at odds with the growling Beethoven

iconography Works within the violin sonata cycle interrogate the hypermasculine Beethoven trope before the last sonata is explored via a host of intertextual relationships with a body of early Romantic repertoire that emerged after Beethoven's death Embracing both the performer's interpretation and the analyst's rigour or vice versa this work offers methodologies for performer's analysis whilst acknowledging that both disciplines are essential to any project that seeks to address the nature of music as it is experienced in time
