Symposium On Complex Analysis:

The Madison Symposium on Complex Analysis Edgar Lee Stout, 1992 This volume contains the proceedings of a Symposium on Complex Analysis held at the University of Wisconsin at Madison in June 1991 on the occasion of the retirement of Walter Rudin During the week of the conference a group of about two hundred mathematicians from many nations gathered to discuss recent developments in complex analysis and to celebrate Rudin's long and productive career Among the main subjects covered are applications of complex analysis to operator theory polynomial convexity holomorphic mappings boundary behaviour of holomorphic functions function theory on the unit disk and ball and some aspects of the theory of partial differential equations related to complex analysis Containing papers by some of the world's leading experts in these subjects this book reports on current directions in complex analysis and presents an excellent mixture of the analytic and geometric aspects of the theory *Proceedings of the Symposium on Complex Analysis Canterbury 1973* J.

Clunie, 1974-08-08 An international conference on complex analysis was held in Canterbury in July 1973 Some of the world's most prominent complex analysts attended and some outstanding open problems had their first solutions announced there These are reflected in this set of Proceedings Almost all of the contributions are abstracts of talks given at the symposium The final part of this volume is a section on research problems contributed by members of the conference and a report on a previous collection of problems edited by Professor W K Hayman after an earlier conference in 1964 This book is essential reading for research workers and graduate students interested in complex analysis **Proceedings of the Rolf**
