Care of the Dying Patient David A. Fleming,John C. Hagan,2010-04-15 Although the need for improved care for dying patients is widely recognized and frequently discussed few books address the needs of the physicians nurses social workers therapists hospice team members and pastoral counselors involved in care *Care of the Dying Patient* contains material not found in other sources offering advice and solutions to anyone professional caregiver or family member confronted with incurable illness and death Its authors have lectured and published extensively on care of the dying patient and here review a wide range of topics to show that relief of physical suffering is not the only concern in providing care This collection encompasses diverse aspects of end of life care across multiple disciplines offering a broad perspective on such central issues as control of pain and other symptoms spirituality the needs of caregivers and special concerns regarding the elderly In its pages readers will find out how to effectively utilize palliative care services and activate timely referral to hospice arrange for care that takes into account patients cultural beliefs and respond to spiritual and psychological distress including the loss of hope that often overshadows physical suffering The authors especially emphasize palliative care and hospice since some physicians fear that such referrals may be viewed by patients and families as abandonment They also address ethical and legal risks in pain management and warn that fear of overprescribing pain medication may inadvertently lead to ineffective pain relief and even place the treating team at risk of liability for undertreatment of pain While physicians have the ability to treat disease they also help to determine the time and place of death and they must recognize that end of life choices are made more complex than ever before by advances in medicine and at the same time increasingly important *Care of the Dying Patient* addresses some of the challenges frequently confronted in terminal care and points the way toward a more compassionate way of death **Hospice Ethics** Timothy W. Kirk,Bruce Jennings,2014-08-28 Hospice care is one of the fastest growing segments of the U S healthcare system a trend that is expected to accelerate as the median age of the population continues to rise over the next three decades Despite over forty percent of the population now dying while on hospice care very little has been published on the ethical opportunities and challenges experienced in the everyday lives of those giving and receiving hospice care This book is the first comprehensive collection devoted to analyzing distinctive ethical issues arising in the delivery of hospice care and designed to promote best ethical practices for hospice care professionals and organizations Thirteen newly commissioned chapters by seventeen hospice experts populate three thematic sections of the book each devoted to an aspect of the intersection between ethics and hospice care Contributors have unique qualifications and abilities to articulate and respond to ethically significant phenomena that while not always unique to

hospice care arise in especially poignant and complex ways when caring for patients enrolled in hospice. As the shift or return to home based care at the end of life continues, hospice professionals and programs will be faced with a broader array of terminal illnesses, cultural beliefs and traditions, and patient and family values than ever before. Hospice will no longer be tailored solely to the final stage of cancer but will need to accommodate patients whose illnesses are variable in their progression and whose treatment plans include many medical options. The ethical orientations and frameworks that have served hospice for the past 50 years will need to be supplemented and refined if hospice is to fulfill this changing social mission. *Hospice Ethics* explores a new paradigm for hospice ethics from a multi-disciplinary and provides an important educational resource for professional training in end of life care. Hospice and Palliative Care Handbook T. M. Marrelli, 2005. This easy to use handbook is the only one of its kind to offer concise, focused coverage of all hospice related conditions. Key topics include professional standards and guidelines, bereavement services, considerations, outcomes, and goals, quality control, and tips for obtaining reimbursement. Couverture **A Physician's Guide to Pain and Symptom Management in Cancer Patients** Janet Abraham, 2005-05-20. Janet L. Abraham argues that all causes of suffering experienced by people with cancer, be they physical, psychological, social, or spiritual, should be treated at all stages: at diagnosis, during curative therapy, in the event that cancer recurs, and during the final months. In the second edition of this symptom-oriented guide, she provides primary care physicians, advanced practice nurses, internists, and oncologists with detailed information and advice for alleviating the stress and pain of patients and family members alike. The new edition includes the latest information on patient and family communication and counseling, on medical, surgical, and complementary and alternative treatments for symptoms caused by cancer, and on caring for patients in the last days and their bereaved families. Updated case histories, medication tables, Practice Points, and bibliographies provide clinicians with the information they need to treat their cancer patients effectively and compassionately.
