Ethics and Economic Theory Khalid Mir, 2018-10-09 This book takes a multi disciplinary critique of economics first principles the fundamental and inter related structuring assumptions that underlie the neo classical paradigm These assumptions that economic agents are rational self interested individuals continue to influence the teaching of economics research agendas and policy analyses The book argues that both the theoretical understanding of the economy and the actual working of real world market economies diminish the scope for thinking about the relation between ethics economics and the economy It highlights how market economies may crowd out ethical behavior and our evaluation of them elides ethical reflection The book calls for a more pluralistic and richer approach to economic theory one that allows ample room for ethical considerations It provides insight into understanding human motivations and human flourishing and how a good economy requires reflection on the ethical relations between the self world and time

The Concept of Work in the History of European Philosophy Gene Callahan, 2025-09-30 This volume offers a historical overview of philosophical thinking about work in a Western context While philosophy has for a long time been interested in the liberative aspects of politics including justice liberty or equality and there are also major philosophical works on the culture of play the topic of work seems to have escaped philosophy s primary focus This is surprising as since the middle of the 19th century the world of work has been at the centre of political struggle and social conflict This collection of essays on how major European thinkers have conceptualised work aims to fill this gap and provides the first concise yet substantial history of philosophical ideas about work *The Concept of Work in the History of European Philosophy* is essential reading for all scholars researchers and advanced students of the history of philosophy It is also ideal for scholars in related fields such as organisational theory and the history of economic thought

technological society It will be of keen interest to graduate students and scholars in political philosophy economics political science and public policy who are interested in these debates **Under Weber's Shadow** Dr Keith Breen,2012-08-01

Under Weber's Shadow presents an extended critical evaluation of the social and political thought of Jürgen Habermas Hannah Arendt and Alasdair MacIntyre Although hailing from very different philosophical traditions these theorists all take as their starting point Max Weber's seminal diagnosis of late modernity the view that the world historic processes of rationalization and disenchantment are paradoxical in promising freedom yet threatening servitude under the iron cage of instrumental reason However each rejects his pessimistic understanding of the grounds and possibilities of political life accusing him of complicity in the very realities he sought to resist Seeking to move beyond Weber's monological view of the self his subjectivism and his identification of the political with domination they offer alternative intersubjective conceptions of the subject ethics and politics that allow for positive future possibilities But this incontrovertible gain it is argued comes at the cost of depoliticizing key arenas of human endeavour and of neglecting the reality of struggle and contestation Engaging with important current debates and literature Keith Breen provides a rigorous analysis of the work of Habermas Arendt MacIntyre and Weber and a highly accessible and original intervention within contemporary social and political thought *Under Weber's Shadow* will therefore be of interest to students and researchers alike within the areas of social and political theory as well as those within the disciplines of ethics sociology and philosophy **Modern Capitalism** Nicholas V.
