Industrialization & Developmen Ray Kiely,1997 Mapping Postcommunist Cultures Vitaly Chernetsky,2007-01-08 In Mapping Postcommunist Cultures Chernetsky argues that Russia and Ukraine exemplify the principal paradigms of post Soviet cultural development In Russia this has manifested itself in the subversive dismantling of the totalitarian linguistic regime and the foregrounding of previously marginalized subject positions In Ukraine work in these areas shows how the traumas of centuries of colonial oppression are being overcome through the carnivalesque decrowning of ideological dogmas and an affirmation of a new type of community most recently demonstrated in the peaceful Orange Revolution of 2004 Mapping Postcommunist Cultures also critiques the neglect of the former communist world in current models of cultural globalization

The Oxford Companion to Comparative Politics Joel Krieger,2013 The two volume Oxford Companion to Comparative Politics fills a gap in scholarship on an increasingly important field within Political Science Comparative Politics the discipline devoted to the politics of other countries or peoples has been steadily gaining prominence as a field of study allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit Comparativists apply various theories and concepts to analyze the similarities and differences between political units using the results of their research to develop causalities and generalizations Each of these theories and outcomes are thoroughly defined in the Companion as are major resultant conclusions those comparativists who have influenced the field in significant ways and politicians whose administrations have shaped the evaluation of contrasting governments Approximately 200 revised and updated articles from the Oxford Companion to Politics of the World would serve as a foundation for the set while over 100 new entries would thoroughly examine the field in a lasting more theoretical than current event based way New entries cover such topics as failed states Grand Strategies and Soft Power important updates include such countries as China and Afghanistan and issues like Capital Punishment Gender and Politics and Totalitarianism Country entries include the most significant nations to permit a focus on non time sensitive analysis In addition 25 1 000 word interpretive essays by notable figures analyze the discipline its issues and accomplishments Collectively entries promote deeper understanding of a field that is often elusive to non specialists

Fighter Aces of the Great War Stephen Wynn,Tanya Wynn,2020-04-30 History has recorded that the first ever powered flight took place at Kitty Hawk in America on 17 December 1903 and was carried out by the Wright brothers Orville

and Wilbur who were aircraft designers and manufacturers By the time of the outbreak of the First World War aviation was only eleven years old The daddy of battlefield warfare until that point in time had been the cavalry a position it maintained even as war was declared on the Western Front Aircraft were not initially seen as an offensive weapon and were instead used by both sides as observation platforms or to take aerial photographs from Even when they were eventually used in an offensive capacity they did not have machine guns attached to them if the crew wanted to open fire then they had to use a pistol or rifle As the war progressed so the use of aircraft changed from being an observational tool to that of a fighter and bomber aircraft something that had never been foreseen at the outbreak of the war The book then looks at the fighter aces from all sides These were pilots who had been credited with shooting or forcing down a minimum of five enemy aircraft of which there were hundreds While some of these aces survived many of them were killed The most famous fighter ace of all is without doubt the German pilot known as the Red Baron Manfred von Richthofen *Chemistry Was Their Life* Marelene F. Rayner-Canham, Geoffrey Rayner-Canham, 2008 British chemistry has traditionally been depicted as a solely male endeavour However this perspective is untrue the allure of chemistry has attracted women since the earliest times Despite the barriers placed in their path women studied academic chemistry from the 1880s onwards and made interesting or significant contributions to their fields yet they are virtually absent from historical records Comprising a unique set of biographies of 141 of the 896 known women chemists from 1880 to 1949 this work attempts to address the imbalance by showcasing the determination of these women to survive and flourish in an environment dominated by men Individual biographical accounts interspersed with contemporary quotes describe how women overcame the barriers of secondary and tertiary education and of admission to professional societies Although these women are lost to historical records they are brought together here for the first time to show that a vibrant culture of female chemists did indeed exist in Britain during the late 19th and early 20th centuries *International Human Rights* Michael Haas, 2008 Publisher Description *Sorrowful Shores* Ryan Gingeras, 2009-02-26 The Turkish Republic was formed out of immense bloodshed and carnage In the years leading up to the ascendancy of Mustafa Kemal Atatürk virtually every town and village throughout Anatolia was wracked by intercommunal violence *Sorrowful Shores* presents a unique history of these bloody years of social and political transformation
