The Mirror Windows:

A Life of Windows & Mirrors Mel Weisburd, 2005 *The Mirror* Sabine Melchoir-Bonnet, 2014-06-03 This engaging and witty cultural history traces the evolution of the mirror from antiquity to the present day illustrating its journey from wondrous object to ordinary trinket With its earliest invention the mirror allowed us to gaze upon ourselves bestowing a power both fascinating and terrifying *The Virtual Window* Anne Friedberg, 2009-02-13 From the Renaissance idea of the painting as an open window to the nested windows and multiple images on today's cinema television and computer screens a cultural history of the metaphoric literal and virtual window As we spend more and more of our time staring at the screens of movies televisions computers and handheld devices windows full of moving images texts and icons how the world is framed has become as important as what is in the frame In *The Virtual Window* Anne Friedberg examines the window as metaphor as architectural component and as an opening to the dematerialized reality we see on the screen In *De pictura* 1435 Leon Battista Alberti famously instructed painters to consider the frame of the painting as an open window Taking Alberti's metaphor as her starting point Friedberg tracks shifts in the perspectival paradigm as she gives us histories of the architectural window developments in glass and transparency and the emerging apparatuses of photography cinema television and digital imaging Single point perspective Alberti's metaphorical window has long been challenged by modern painting modern architecture and moving image technologies And yet notes Friedberg for most of the twentieth century the dominant form of the moving image was a single image in a single frame The fractured modernism exemplified by cubist painting for example remained largely confined to experimental avant garde work On the computer screen however where multiple windows coexist and overlap perspective may have met its end In this wide ranging book Friedberg considers such topics as the framed view of the camera obscura Le Corbusier's mandates for the architectural window Eisenstein's opinions on the shape of the movie screen and the multiple images and nested windows commonly displayed on screens today *The Virtual Window* proposes a new logic of visibility framed and virtual an architecture not only of space but of time
