Sir Humphry Davy Rolleston

Sir James Mackenzie 1853 1925:

Sir James Mackenzie, M.D., 1853-1925 Alex Mair,1986 **Sir James Mackenzie MD** Alex Mair,1986 **A History of Electrocardiography** George Edward Burch,Nicholas P. DePasquale,1990 **The Transformation of the Psyche in British Primary Care, 1870-1970** Rhodri Hayward,2014-02-25

Conflicting models of selfhood have become central to debates over modern medicine Yet we still lack a clear historical account of how this psychological sensibility came to be established The Transformation of the Psyche in British Primary Care 1880 1970 will remedy this situation by demonstrating that there is nothing inevitable about the current connection between health identity and personal history It traces the changing conception of the psyche in Britain over the last two centuries and it demonstrates how these changes were rooted in transformed patterns of medical care The shifts from private medicine through to National Insurance and the National Health Service fostered different kinds of relationship between doctor and patient and different understandings of psychological distress The Transformation of the Psyche in British Primary Care 1880 1970 examines these transformations and in so doing provides new critical insights into our modern sense of identity and changing notions of health that will be of great value to anyone interested in the modern history of British medicine **The Journal of Organotherapy** ,1924

Healing the Schism Kerr L. White,2012-12-06 My conviction is that the matters addressed in this volume are of transcendental importance if we are to face up to the challenges of the 1990s and beyond How for instance are we to cope with a truly ecological approach to public health and all its concomitant changes of risk groups worldwide unless there is a full appreciation of the population perspective throughout the health establishment The global village has achieved a measure of interdependence requiring recognition by all concerned with the health of both individuals and communities that there is an urgent need to share our knowledge and deploy our resources in the best interests of people everywhere The history of public health initiatives the origins of epidemiology and the tragic separation virtually a divorce of public health from medicine recounted in the chapters that follow argue strongly for an early rapprochement Health professionals who complement each other's knowledge and skills can be reunited through their common reliance on epidemiology as a major fundamental science for the entire health enterprise Henceforth epidemiology should be ranked in importance with cellular and molecular biology immunology and the social and systems sciences all are essential if we are to cope with the vast array of diseases and disorders that face us in both the developed and developing worlds We need more first rate laboratory scientists clinicians nurses aides village health workers and managers committed to serving the public **A Dictionary of the History of Medicine** Anton Sebastian,2018-02-06 This is a unique extensively illustrated dictionary of terms people events and dates spanning the entire history of medicine It is a monumental work of scholarship totaling some 700 double column pages with a large number of rare and exceptional illustrations from many original sources painstakingly compiled over years of far searching inquiry involving more than 5 000 books and hundreds of journals It is a major resource of hard to

Jacyna, 2016-09-12 This is the first in depth study of the English neurologist and polymath Sir Henry Head 1861 1940 Head bridged the gap between science and the arts He was a published poet who had close links with such figures as Thomas Hardy and Siegfried Sassoon His research into the nervous system and the relationship between language and the brain broke new ground L S Jacyna argues that these advances must be contextualized within wider Modernist debates about perception and language In his time Head was best known for his research into the human nervous system He did a series of experiments in collaboration with W H R Rivers in which cutaneous nerves were surgically severed in Head s arm and the stages by which sensation returned were chartered over several years Head s friend the philosopher Alfred North Whitehead drew out the epistemological implications of how in this new conception the nervous system furthered the knowledge of the world
