Music in the Early Years Aelwyn Pugh, Lesley Pugh, 2013-11-05. Research findings repeatedly show that music is one of the subjects which teachers feel least confident to tackle. There are many reasons for this, not least being the lack of appropriate guidance and training. This book is designed to help overcome these problems by providing class teachers with clear advice on how to plan, resource and deliver a comprehensive programme which will challenge their pupils and enable them to progress and meet national requirements. The book includes examples and activities which can be used as a basis for in-service training within schools, particularly for teachers who regard themselves as non-specialists.

Functional Neurobiology of Aging Patrick R. Hof, Charles V. Mobbs, 2001-01-11. Some well known age related neurological diseases include Parkinson's disease, Alzheimer's disease, deafness and blindness. Even more common are the problems of aging which are not due to disease but to more subtle impairments in neurobiological systems including impairments in vision, memory loss, muscle weakening and loss of reproductive functions, changes in body weight and sleeplessness. As the average age of our society increases, diseases of aging continue to become more common and conditions associated with aging need more attention by doctors and researchers. In 1991, patients over the age of 65 saw their doctors an average of eight times per year. Research funding is provided by the Neuroscience and Neuropsychology of Aging (NNA) Program which is run by the National Institute on Aging. This book offers a comprehensive overview of all topics related to functional impairments which are related to the aging brain and nervous system. It is organized according to four general functions: movement, senses, memory and neuroendocrine regulation. Written by the leading researchers in the field, this comprehensive work addresses both impairments associated with diseases and not associated with diseases, making it easier to understand the mechanisms involved. *Functional Neurobiology of Aging* is an important reference for professionals and students involved in aging research as well as physicians who need to recognize and understand age related impairments. Organized by function, making it easy to find and understand the material. Addresses impairments both associated with diseases and not associated with diseases. Written by leading researchers in the field. Most comprehensive source of information on the neurobiology of aging.
