Sources Of Hermeneutics:

Sources of Hermeneutics Jean Grondin, 1995-01-01 This book provides an introduction to the historical sources of philosophical hermeneutics as it has come to fruition in the work of Heidegger and Gadamer **Digital** History and Hermeneutics Andreas Fickers, Juliane Tatarinov, 2022-06-21 As a result of rapid advancements in computer science during recent decades there has been an increased use of digital tools methodologies and sources in the field of digital humanities While opening up new opportunities for scholarship many digital methods and tools now used for humanities research have nevertheless been developed by computer or data sciences and thus require a critical understanding of their mode of operation and functionality The novel field of digital hermeneutics is meant to provide such a critical and reflexive frame for digital humanities research by acquiring digital literacy and skills A new knowledge for the assessment of digital data research infrastructures analytical tools and interpretative methods is needed providing the humanities scholar with the necessary munition for doing critical research The Doctoral Training Unit Digital History and Hermeneutics at the University of Luxembourg applies this analytical frame to 13 PhD projects By combining a hermeneutic reflection on the new digital practices of humanities scholarship with hands on experimentation with digital tools and methods new approaches and opportunities as well as limitations and flaws can be addressed Strong Hermeneutics Nicholas H. Smith, 2002-09-11 Recent years have seen a resurgence of interest in ethics particularly in the approaches of deconstruction and hermeneutics At the same time questions of identity have risen to prominence in philosophy and beyond into cultural studies and literature Strong Hermeneutics is a clear and accessible investigation of both the enlightenment and postmodern or weak approaches to contemporary discussions of ethics The weak view which can be traced back to Nietzche and seen in the recent work of Rorty and Lyotard is sceptical of any universal principles in ethics The enlightenment view starting with Kant and more recently seen in the work of Habermas views identity as subject to universal but formal moral constraints the renewing of which is the proper task of ethics Nicholas Smith argues that neither of these views can provide a proper framework for ethics He puts forward a third position a strong hermeneutics drawing on the work of Hans Georg Gadamer Paul Ricoeur and Charles Taylor Strong Hermeneutics presents a defence of this view compares it with the realism and anti realism debate in philosophy and demonstrates its relevance to contemporary issues particularly ecological responsibility Mary Daly's (1928-2010) Theological Method of Ontolinquistic Hermeneutics Antonina Wozna, 2025-03-03 Ontolinquistics theological Hermeneutics sources and Daly's proposal analyses the method used by Mary Daly her constructive criticism of the traditional theological method and her proposal to combine the best insights of the Christian tradition hermeneutic philosophy and feminist theology The book brings together the inputs of a pioneer in feminist theology Mary Daly on the much debated issue of theology as method This book along with Antonina Wozna's Theological hermeneutics and Daly's verification process are important reads for scholars working in the intersection of theology gender and feminism The

Oxford Handbook of the Sources of International Law Jean d'Aspremont, Samantha Besson, Sévrine Knuchel, 2017-10-19 The question of the sources of international law inevitably raises some well known scholarly controversies where do the rules of international law come from And more precisely through which processes are they made how are they ascertained and where does the international legal order begin and end This is the static question of the pedigree of international legal rules and the boundaries of the international legal order Second what are the processes through which these rules are made This is the dynamic question of the making of these rules and of the exercise of public authority in international law The Oxford Handbook of the Sources of International Law is the very first comprehensive work of its kind devoted to the question of the sources of international law It provides an accessible and systematic overview of the key issues and debates around the sources of international law It also offers an authoritative theoretical guide for anyone studying or working within but also outside international law wishing to understand one of its most foundational questions This Handbook features original essays by leading international law scholars and theorists from a range of traditions nationalities and perspectives reflecting the richness and diversity of scholarship in this area **The Hermeneutics of Divine Testing Nicholas Ellis, 2015-06-29** Nicholas Ellis examines the interplay present in early Jewish literature between authors theological assumptions on divine agency in evil and their readings of biblical testing narratives Ellis takes as a starting point the Epistle of James and compares this early Christian work against other examples of ancient Jewish interpretation Ellis shows how varying perspectives on the divine satanic and human roles of testing exercised a direct influence on the interpretation of popular biblical testing narratives such as Abraham and Isaac Job and the Trials in the Wilderness Read in light of the broader Jewish literature Ellis argues that the theology and hermeneutic found in the Epistle of James as such relate to divine testing are closely paralleled by the so called Rewritten Bible tradition Within James cosmic drama God stands as righteous judge with the satanic prosecutor indicting both divine integrity and human religious loyalty Our'anic Hermeneutics Bruce Fudge, 2012-08-06 The work of the twelfth century Shi ite scholar al Tabrisi Majma al bayan is one of the most important works of medieval commentary on the Qur an and is still in use today This work is an in depth case study of Islamic exegetical methods and an exploration of the nature of scriptural interpretation in Islam Drawing on a wide variety of sources including unpublished manuscripts the author examines how exegesis serves to construct maintain and defend the status of the Qur an as scripture and to uphold certain ideological agendas among them the notion of the literary and rhetorical supremacy of God's revelation in Arabic Focusing on the genre and process of Qur anic exegesis itself he treats Qur an interpretation as part of a category of religious practice recognizable from the history and comparative study of religion Written in clear and accessible style Qur anic Hermeneutics makes Qur anic exegesis intelligible to specialists in Islam as well as those interested in scripture and its interpretation in general As such it will be a valuable reference to scholars of Islamic studies religion and scripture **Introduction to Phenomenology** Dermot Moran, 2002-06-01 Introduction to

Mauro Gagliardi, 2024-09-16 Throughout his prodigious theological and ecclesiastical career Joseph Ratzinger advanced a rich and nuanced theology of Revelation reflecting at length on the nature unity and interrelationship of Scripture and Tradition on their native ecclesial context and on their transformative Christ centered purpose and aim Ratzinger's many writings in this area are marked not only by an unwavering fidelity to divinely revealed truth but also by sensitivity to the difficulties of its interpretation to the dynamics of

historical progress and regress and to the needs of the Church and the world within the modern era In Revelation Hermeneutics and Doctrinal Development in Joseph Ratzinger Mauro Gagliardi offers a penetrating diachronic study of Ratzinger's thought on these foundational themes Beginning with his 1955 Habilitationsschrift on St Bonaventure's understanding of Revelation and continuing in his works of the conciliar and post conciliar periods through those of his episcopacy and later pontificate Gagliardi traces Ratzinger's vision of Scripture and Tradition of the Magisterium and theology and of faith and its transmission today By turns critical and appreciative Gagliardi elucidates the German theologian s teaching on Revelation in depth exploring its underlying hermeneutic commitments and in the book s final chapter elaborating its implications for the question of the development of doctrine a topic of both longstanding and pressing importance within Catholic theology and Christian thought Reflexive Methodology Mats Alvesson, Kaj Sköldberg, 2009-09-15 Praise for the First Edition Reflexive Methodology is a textbook indispensable to any young researcher It does not tell its readers how to do research It does something much more important It shows how research has been done in the qualitative tradition thus encouraging the readers to make their own choices Barbara Czarniawska Goteborg University I would go so far as to argue that this book should be on the reading list of all social scientists and philosophers with an interest in the theory and practice of research Prometheus Reflexive Methodology established itself as a groundbreaking success providing researchers with an invaluable guide to a central problem in research methodology how to put field research and interpretations in perspective paying attention to the interpretive political and rhetorical nature of empirical research Now thoroughly updated the Second Edition includes a new chapter on positivism social constructionism and critical realism and offers new conclusions on the applications of methodology It also provides further illustrations and updates that build on the acclaimed and successful first edition Reflexivity is an essential part of the research process In this book Mats Alvesson and Kaj Skoldberg make explicit the links between techniques used in empirical research and different research traditions giving a theoretically informed approach to qualitative research The authors provide balanced reviews and critiques of the major schools of grounded theory ethnography hermeneutics critical theory postmodernism and poststructuralism discourse analysis genealogy and feminism This book points the way to a more open minded creative interaction between theoretical frameworks and empirical research It continues to be essential reading for students and Biblical Hermeneutics in the Metamodern Mood Seán M. W. researchers across the social sciences McGuire, 2024-07-23 Why do contemporary Christians seem to routinely talk past one another amid contentious theological debates In this illuminating study Sean M W McGuire argues that interpreters lack of self critical reflection on the process of interpretation and compounding cultural factors are problematizing interpretive practice. Thus to work through difficult topics Christians need to develop the ability to reflect on the complexity informing how they interpret Scripture and how they see others interpreting Scripture so that they can coherently and constructively discuss their interpretations with others

Grounding the study in the discipline of practical theology McGuire utilizes the cultural theory of metamodernism and the hermeneutics of Hans Georg Gadamer 1900 2002 together with a proposed revision of the Wesleyan Quadrilateral to develop a paradigm for observing and describing differences in biblical interpretive practice Using current debates regarding sexuality as an illustrative example the project reveals the complexity underlying contemporary interpretive practice showing that amid this complexity the prioritization or lack thereof of theological reflection sources prompts certain interpretive conclusions Perceiving the multivalent nature of interpretation readers will be equipped to think carefully and critically about how they come to their biblical interpretive conclusions and how those conclusions inform transformed living in Christ
