Sources And Shapes Of Power Into Our Third Century:

Sources and Shapes of Power John R. Sherwood, John C. Wagner, 1981 Image and Reality of Roman Imperial Power in the Third Century AD Lukas de Blois, 2018-09-03 *Image and Reality of Roman Imperial Power in the Third Century AD* focuses on the wide range of available sources of Roman imperial power in the period AD 193-284 ranging from literary and economic texts to coins and other artefacts This volume examines the impact of war on the foundations of the economic political military and ideological power of third century Roman emperors and the lasting effects of this This detailed study offers insight into this complex and transformative period in Roman history and will be a valuable resource to any student of Roman imperial power Coining Images of Power Erika Manders, 2012-01-06 Current scholarship on Roman imperial representation addresses both the ways in which individual rulers presented themselves to their subjects and how particular aspects of imperial representation developed over time This book combines these two approaches It examines the diachronic development of the representation of Roman imperial power as a whole in one medium over a longer period of time Through a quantitative and qualitative analysis of coin types issued between AD 193 and 284 patterns in the representation of third century Roman emperors on imperial coinage are made visible The result is a new perspective on the development of imperial ideology in times of crisis *Aurelian and the Third Century* Alaric Watson, 2004-01-14 *Aurelian and the Third Century* provides a re-evaluation in the light of recent scholarship of the difficulties facing the Roman empire in the AD 260s and 270s concentrating upon the reign of the Emperor Aurelian and his part in summoning them With introduction examining the situation in the mid third century the book is divided into two parts Part 1 deals chronologically with the military and political events of the period from 268 to 276 Part 2 analyzes the other achievements and events of Aurelian's reign and assesses their importance A key supplement to the study of the Roman Empire *The Sources of Social Power: Volume 1, A History of Power from the Beginning to AD 1760* Michael Mann, 1986-04-30 Distinguishing four sources of power in human societies ideological economic military and political *The Sources of Social Power* traces their interrelations throughout human history Volume 2 deals with power relations between the Industrial Revolution and the First World War *The Roman Empire at Bay, AD 180-395* David Stone Potter, 2004 At the outset of the period covered by this book Rome was the greatest power in the world By its end it had fallen conclusively from this dominant position David Potter's comprehensive survey of two critical and eventful centuries traces the course of imperial decline *The Image of Political Power in the Reign of Nerva, AD 96-98* Nathan T. Elkins, 2017 At age 65 Nerva assumed the role of emperor of Rome just sixteen months later his reign ended with his death Nerva's short reign robbed his regime of the opportunity for the emperor's imperial image to be defined in building or monumental art leaving seemingly little for the art historian or archaeologist to consider In view of this paucity studies of Nerva primarily focus on the historical circumstances governing his reign with respect to the few relevant literary sources *The Image of Political Power in the Reign of Nerva AD 96-98* by contrast takes

the entire imperial coinage program issued by the mint of Rome to examine the self representation and by extension the policies and ideals of Nerva's regime. The brevity of Nerva's reign and the problems of retrospection caused by privileging posthumous literary sources make coinage one of the only ways of reconstructing anything of his image and ideology as it was disseminated and developed at the end of the first century during the emperor's lifetime. The iconography of this coinage and the popularity and spread of different iconographic types as determined by study of hoards and finds and as targeted towards different ancient constituencies offers a more positive take on a little studied emperor. Across three chapters Elkins traces the different reverse types and how they would have resonated with their intended audiences concluding with an examination of the parallels between text and coin iconography with previous and subsequent emperors. *The Image of Political Power in the Reign of Nerva AD 96-98* thus offers significant new perspectives on the agents behind the selection and formulation of iconography in the late first and early second century showing how coinage can act as a visual panegyric similar to contemporary laudatory texts by tapping into how the inner circle of Nerva's regime wished the emperor to be seen.

The Posen Library of Jewish Culture and Civilization, Volume 2 Carol Bakhos, 2025-09-09. An extensive collection of Jewish texts and visual artifacts representing the memory, identity and culture of ancient Jewish life over nearly a thousand years. Volume 2 of the Posen Library of Jewish Culture and Civilization covers Jewish life as it evolved in the first several centuries following the biblical period. Jewish identity grew from its Israelite background and took on new dimensions shaped by cultural exchanges and interactions with surrounding civilizations including the Greek, Roman, Sasanian and Parthian Empires. Shifts in Jewish culture during this long period include the rise of sectarianism, the expansion of the concept of Torah, the shift from Temple to synagogue, the disappearance of the priesthood and the emergence of rabbis and the development of new forms of liturgy. These years laid the groundwork for the rich tapestry of Jewish identity that would continue to evolve throughout history. Providing a robust collection of written and visual primary resources, Volume 2 affords an unmatched opportunity to discover the forms and movements of ancient Judaism and the institutions around which Jews centered their lives.

Coins and Power in Late Iron Age Britain John Creighton, 2000-07-06. Cunobelin, Shakespeare's Cymbeline, ruled much of south east Britain in the years before Claudius's legions arrived, creating the Roman province of Britannia. But what do we know of him and his rule and that of competing dynasties in south east Britain? This book examines the background to these, the first individuals in British history. It explores the way in which rulers bolstered their power through the use of imagery on coins, myths, language and material culture. After the visit of Caesar in 55 and 54 BC, the shadow of Rome played a fundamental role in this process. Combining the archaeological, literary and numismatic evidence, John Creighton paints a vivid picture of how people in late Iron Age Britain reacted to the changing world around them.

Land and Power in Ptolemaic Egypt Joseph Gilbert Manning,2003-05-29 This history of land tenure under the Ptolemies explores the relationship between the new Ptolemaic state and the ancient traditions of landholding and tenure Departing from the traditional emphasis on the Fayyum it offers a coherent framework for understanding the structure of the Ptolemaic state and thus of the economy as a whole Drawing for the first time on both Greek and demotic papyri as well as hieroglyphic inscriptions and theories taken from the social sciences Professor Manning argues that the traditional central state despotic model of the Egyptian economy is insufficient The result is a subtler picture of the complex relationship between the demands of the new state and the ancient locally organized social structure of Egypt By revealing the dynamics between central and local power in Egypt the book shows that Ptolemaic economic power ultimately shaped Roman Egyptian social and economic institutions
