**Landscapes and Landforms of South Africa** Stefan Grab, Jasper Knight, 2015-03-05 This book presents a beautifully illustrated overview of the most prominent landscapes of South Africa and the distinctive landforms associated with them. It describes the processes, origins and the environmental significance of those landscapes including their relationships to human activity of the past and present. The sites described in this book include amongst others the Blyde River Canyon, Augrabies Falls, Kruger National Park, Kalahari desert landscapes, the Great Escarpment, Sterkfontein caves and karst system, Table Mountain, Cape winelands, coastal dunes, rocky coasts, Boer War battlefield sites and Vredefort impact structure. *Landscapes and Landforms of South Africa* provides a new perspective on South Africa's scenic landscapes by considering their diversity, long and short term histories and importance for geoconservation and geotourism. This book will be relevant to those interested in the geology, physical geography and history of South Africa, climate change and landscape tourism.

***Southern African Landscapes and Environmental Change*** Peter J. Holmes, John Boardman, 2018-07-04 This volume provides a textbook and reference work on the physical and biotic landscapes of Southern Africa. It examines the links between these environments and the ways in which they have been and will likely be subject to change. It covers the geomorphology, soils, vegetation and land use across a range of landscapes including mountains, coasts, savannah, drylands and wetlands and identifies the impacts of current and potential climate change and other factors on these environments. The geographical focus is on the region defined by Namibia, South Africa, Botswana, Mozambique, Zimbabwe, Lesotho and Swaziland. Illustrated throughout in full colour, the book will serve as a reference volume for researchers and environmental professionals internationally as well as a textbook for senior undergraduate and graduate level students of geography, ecology and environmental studies in Southern Africa.

**50 Must-See Geological Sites in South Africa** Gavin Whitfield, 2016-01-11 The book presents 50 of the most recognizable and geologically interesting sites around South Africa including some of palaeontological or historical renown and some of mining interest. The diverse selection includes sites such as Chapman's Peak, Howick Falls, Walter Sisulu National Botanical Gardens, Mapungubwe, Tswaing Meteorite Crater and the Fraserburg Fossil Surface. Each site is unpacked to reveal key features, geological heritage, landscape and rock formations, topics of local or historical interest, things to see and do at the site and in the surrounding area. Maps and GPS pointers make the sites easy to find and some of the more complicated features are explained by means of simplified diagrams. Nearly 1 000 colour images illustrate South Africa's remarkable geology and bring the topic vividly to life, making the book suitable for armchair travel too.

Geology and all academics in the earth sciences      Gondwana Landscapes in southern South America Jorge Rabassa, Cliff Ollier, 2014-04-11 This book presents extensive and new information on the geomorphology of cratonic areas of southern South America It includes valuable data relating to recurrent controversies in general geomorphology beyond the boundaries of South America and reveals the great need to integrate many different aspects of geomorphology in regional studies With the focus on ancient landscapes and especially on planation surfaces it addresses the question of what processes could form such huge features and how they can be preserved for so long Many of the papers include maps of planation surfaces or other geomorphic units The volume brings together an up to date state of the art collection of information on South American geomorphology and shows beyond doubt that geomorphology is on the same time scale as global tectonics biological evolution and major climate change Some of the papers describe ancient geomorphological features of areas that have never been studied or published before while others describe regions which are totally unknown to the public The scope of the book extends from tropical latitudes north of the Tropic of Capricorn south to freezing Patagonia in the roaring fifties more than 3 500 km from north to south Including over one thousand citations from geological and geomorphological literature this volume will serve as a starting point for a whole new phase of studies of the fascinating landscape history of southern South America      *Geomorphological Landscapes of the World* Piotr Migon, 2010-01-22 Physical landscapes are one of the most fascinating facets of our Planet which tell stories about the evolution of the surface of the Earth This book provides up to date information about the geomorphology of the selected classic sites from around the world and shows the variety of geomorphological landscapes as moulded by different sets of processes acting over different timescales from millions of years to days The volume is written by nearly fifty geomorphologists from more than twenty countries who for many years have researched some of the unique sceneries on the planet The thirty six chapters present each continent of the world They describe landscapes of different origin so that the reader can learn about the complexity of processes behind the sceneries This is a useful reference book linking geomorphology with global initiatives focused on nature conservation      **South African Scenery, a Textbook of Geomorphology** Lester C. King, 1970-01-01      **South Africa** Monica Cole, 2022-10-05 Originally published in 1961 this book was the first comprehensive work on South African geography that also presented a balanced account of all facets of the economic life It was written to provide background information on South Africa the nature of the country its resources and deficiencies its historic settlement by peoples of different races and of the progress made and the difficulties encountered in the major areas of economic activity agriculture mining manufacturing and trade In discussing these factors the book acknowledged that in South Africa the complexities of the relationships between peoples of different racial origins and widely differently economic and cultural standards are met in one country      The Geography of South Africa Jasper Knight, Christian M.
