**Corpus Linguistics** Geoffrey Sampson, Diana McCarthy, 2005-10-01 *Corpus Linguistics* seeks to provide a comprehensive sampling of real life usage in a given language and to use these empirical data to test language hypotheses Modern corpus linguistics began fifty years ago but the subject has seen explosive growth since the early 1990s These days corpora are being used to advance virtually every aspect of language study from computer processing techniques such as machine translation to literary stylistics social aspects of language use and improved language teaching methods Because corpus linguistics has grown fast from small beginnings newcomers to the field often find it hard to get their bearings Important papers can be difficult to track down This volume reprints forty two articles on corpus linguistics by an international selection of authors which comprehensively illustrate the directions in which the subject is developing It includes articles that are already recognized as classics and others which deserve to become so supplemented with editorial introductions relating the individual contributions to the field as a whole This collection of readings will be useful to students of corpus linguistics at both undergraduate and postgraduate level as well as academics researching this fascinating area of linguistics

**Quaternary of South-West England** S. Campbell, C.O. Hunt, James D. Scourse, D.H. Keen, N. Stephens, 2012-12-06 **STRUCTURE OF THE VOLUME AND TERMINOLOGY USED** This book contains scientific descriptions of 63 localities Figure A of at least national importance for Quaternary geology geomorphology and environmental change in South West England These sites were selected by the

Geological Conservation Review and are accordingly designated GCR sites Chapter 1 provides an introduction to the Quaternary Chapter 2 synthesizes the geomorphological development and Quaternary history of the region and outlines the principles involved in site selection The individual GCR site descriptions form the core of the book In the following chapters sites are arranged and described in broad geographic areas and by research topic This is necessitated by the widely disparate nature of the field evidence in South West England sites demonstrating the full range of Quaternary and geomorphological features are not evenly and conveniently dispersed throughout the region and some areas have significant gaps Neither do the individual chapters contain sites that necessarily equate with particular site selection networks Rather the chosen chapter headings provide the least repetitive means of describing the sites and background material Where possible a chronological approach from oldest to youngest has been used to describe sites within a given chapter Again this approach is not always possible and a group of sites may show variations on landform or Stratigraphic evidence broadly within one major time interval or chronostratigraphic stage inevitably there are many overlaps

Contesting Rurality Michael Woods,2017-05-15 Rural issues have gained national prominence in Britain in recent years The future of hunting the Foot and Mouth outbreak farm income and agricultural reform and housing development have all claimed political and media attention promoted by a vocal rural lobby and headline grabbing protests and demonstrations Combining detailed empirical research and case studies with theoretically informed critical analysis this book provides an overview of the contemporary politics of the British countryside It explores how and why rural issues have suddenly achieved such political prominence by examining the changing politics and governance of rural Britain from the local to the national scale over the past century It investigates the social economic and institutional restructuring of rural communities and argues that we are witnessing not so much a rural politics but a politics of the rural in which the definition and representation of rurality itself has become the key focus of conflict
