who have attempted to capture its strange inhospitable blankness She considers the Pole s advantages for climatologists and other scientists as well as the absurdities and banalities of human interaction with this place Ranging from the present all the way back to the ancient Greeks she offers a fascinating and lavishly illustrated story about one of the strangest and most important places on Earth 90° south Paul Siple,1959 The exciting story of the building of the American base at the South Pole and of the 18 men who were the first human beings to winter at the very bottom of the world *South Pole Station* Melvin Berger,1971 Describes the equipment research projects scientific personnel and daily routines at the fourteen year old South Pole Station **Amundsen-Scott South Pole Station CLIMAT Message Project** Matthew A.
