OECD

Southsouth Trade In Global Development:

South-south Trade in Global Development Elizabeth Parsan,1993 This study undertakes a comprehensive evaluation of the major issues involved in a strategy of South South trade and demonstrates the actual potential and problems of such trade through a case study of Brazil Trinidad and Tobago trade in the petrochemicals sector It argues that in general that there is great potential for South South trade in both goods and services but its realization will require the implementation of certain policy measures such as the removal of trade policy barriers and financial constraints Likely future declines in traditional trading opportunities with the North plus the special developmental gains to be derived from South South trade should provide incentives for such policy changes However the relative importance which a country may attach to a South South trade strategy will depend upon its specific conditions and features In view of the growing interdependence of the world economy an appropriate mix of policies which includes both South South and South North trade is crucially important for the future development of the South

South-South Trade and Development Thyge Enevoldsen,Niels Fold,Steen Folke,2016-07-27 The book gives a thorough analysis of South South trade in a theoretical and political framework The development of South South trade in manufactured goods since the 1960s is treated in detail Problems and potentials of South South trade in a development context are highlighted through a number of case studies the South South export of manufactured goods from Togo Nicaragua and Malaysia Zimbabwe s export of manufactures to Zambia and India s export of capital goods to Tanzania This leads to an assessment of the possible future role of South South trade in furthering Third World development

SouthSouth Trade and Finance in the Twenty-First Century Omar Dahi,Firat Demir,2016-10-10 This book is a contribution to the international trade and economic development literature and is based on a decade of joint research and collaboration on South South economic relations Given the increasing focus on the economic power of some developing countries for example the 2013 Human Development Report s Rise of the South it is particularly appropriate and timely NP The book s findings are based on rigorous empirical examination of South South trade and finance and it provides an even handed assessment from the perspective of long term development goals rather than mainstream welfare approaches or ideological theoretical worldview NP This work directly engages with the new developmentalism literature that has challenged the neoliberal orthodoxy and its policy approach which focuses on liberalization privatization and deregulation It also engages with literature by examining whether the increase in South South trade facilitates or inhibits the possibilities for developmentalist economic policy in developing countries The book shows concrete and positive results from South South trade particularly related to industrial development and also documents how South South trade is dominated by large developing countries and that South South trade liberalization may be counterproductive
