World War II Established and expanded by Edward Steidle during his tenure at The Pennsylvania State University the
collection with its unique focus on the mineral industries is one of the most comprehensive assemblages of American
industrial art The Steidle Collection is preserved and exhibited by the Earth and Mineral Sciences Museum and Art Gallery
The Steidle Collection remains today a remarkable artifact at the intersection of art industry and education As a time capsule

of the period between the stock market crash of 1929 and World War II the collection sheds light on Pennsylvania's most important industries. The unique beauties of steel and coal that inspired the artists in this collection remind us of the power these industries held in the culture and economy of Pennsylvania. At the time he assembled his industrial art collection Dean Steidle could hardly have imagined the collapse of the nation's formidable steel industry and the disappearance of the blast furnaces that inspired such powerful paintings and prints. Edward Steidle was singular; one writer characterized him as a spark plug and his remarkable vision of art embedded in the School of Earth and Mineral Sciences remains a legacy for the citizens of the Commonwealth and for The Pennsylvania State University. *Annual Report - National Gallery of Art* National Gallery of Art (U.S.), 1983

Portraits of Industry Lorie A. Annarella, 2004. The fourteen paintings reviewed in this study chronicle industrial artist Howard L. Worner's interpretation of the steel industry. By employing ethnographic techniques to his art, Worner contributed much to the understanding of the culture of work. This book will provide students of art education a better understanding of the genre through artistic ethnography and interpretation as well as an excellent overview of industrial art.
